RE: HOLMES COUNTY
CHARM COUNTRY VIEW INN
NPDES #3PR00397
2010 CEI

CERTIFIED MAIL

Mr. Paul Miller
P.O. Box 100
Charm, OH 44617

Dear Mr. Miller:

On February 4, 2010, this writer along with Dean Stoll conducted an unannounced Compliance Evaluation Inspection (CEI) of the wastewater treatment plant serving the above referenced facility. The intent of the inspection was to assess operations and maintenance of the system.

Observations

At the time of the inspection, the treatment plant was considered marginal. Observed problems with the sand filters were:

- 1) The sand filter closest to the driveway was ponded to the point of near overflowing. Because of the depth of the wastewater in the filter, it was impossible to determine the cause of the problem, and
- 2) The distribution pipe was not attached to the second sand filter farthest from the driveway. The splash plate was also located in the corner of the filter rather than at the center of the filter.

In addition to problems with the sand filter, the disinfection tank contained leaves and debris that need to be removed. The debris could inhibit the effectiveness of the disinfection chemicals during the disinfection season.

Other observations made during the inspection were:

- a) The distribution box for the sand filter was replaced with a new box. This was necessary because of the degraded condition of the previous concrete box,
- b) The mixed liquor in the aeration tank had a good color and mixing, and
- c) Both blowers and dosing pumps were operational.

Mr. Paul Miller
Charm Country View Inn

Compliance Review

The Discharge Monitoring Reports (DMRs) submitted each month by the Charm Country View Inn were reviewed for compliance with the NPDES Permit. The period of review was April through December 2009. Following is a list of limit violations reported during the review period.

Date	Parameter	Measuring Frequency	Limit	Reported Value	Units
9/3/2009	pH	1/day	9.0	9.2	S.U.
10/1/2009	TSS	30-Day Conc.	12.0	36	mg/l
10/1/2009	TSS	30-Day Load	0.14	0.34	kg/d
10/15/2009	TSS	7-Day Conc.	18.0	36	mg/l
10/15/2009	TSS	7-Day Load	0.3	0.34	kg/d

In addition to the limit violations, it appears that starting in June 2009, there are a significant number of frequency violations each month for color, odor and turbidity. The reported violations are included in Attachment 1. Be advised the limit and frequency violations constitute violations of the Ohio Revised Code 6111.07. Reporting the daily observations must be done at the frequency specified in the NPDES Permit.

NPDES Permit Renewal

When the NPDES Permit for your facility is renewed, it will contain final limits for E. coli bacteria rather than Fecal Coliform bacteria. This is necessary to incorporate changes to the Ohio water quality standards into the permit. In order to provide the necessary time to ensure compliance with the new limits on E. coli, a compliance schedule will be incorporated in the permit along with interim monitoring requirements. It is recommended that you and your operator of record carefully review the draft NPDES Permit upon receipt to ensure that the monitoring requirements and compliance schedule are understood. You may contact this writer in the event you have questions regarding these issues.

Conclusions

Based on this most recent inspection, the following actions are necessary to correct observed problems.

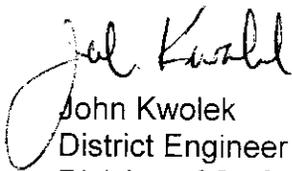

- 1) Install the distribution pipe on the sand filter farthest away from the driveway,
- 2) Relocate the splash plate to the center of the filter and position the outlet of the distribution pipe on the splash plate,

Mr. Paul Miller
Charm Country View Inn
February 16, 2010
Page 3

- 3) Switch the filters so that the filter closest to the driveway can be rested for cleaning,
- 4) Coordinate with the licensed operator to determine who will record the daily observation for color, odor and turbidity. The Charm Country View Inn must report those parameters at the daily frequency required by the permit, and
- 5) Remove the leaves and other debris from the disinfection tank prior to the disinfection season which starts May 1st of each year.

Please notify this writer when the above actions are completed. You may contact this writer at (330) 963-1251, or at john.kwolek@epa.state.oh.us to discuss any questions you may have regarding this inspection report or your NPDES Permit.

Sincerely,

John Kwolek
District Engineer
Division of Surface Water

JK/mt
