ENTERED DIRECTOR'S JOURNAL

In the Matter of:

Republic Engineered Products, Inc. : Director's Final Findings
1807 E. 28th Street : and Orders
Lorain, Ohio 44055 :

PREAMBLE

It is agreed by the parties hereto as follows:

I. JURISDICTION

These Director's Final Findings and Orders ("Orders") are issued to Republic Engineered Products, Inc. ("Respondent") pursuant to the authority vested in the Director of the Ohio Environmental Protection Agency ("Ohio EPA") under Ohio Revised Code ("ORC") § 3704.03 and 3745.01.

II. PARTIES BOUND

These Orders shall apply to and be binding upon Respondent and successors in interest liable under Ohio law. No change in ownership of the Respondent or of the Facility (as hereinafter defined) shall in any way alter Respondent's obligations under these Orders.

III. DEFINITIONS

Unless otherwise stated, all terms used in these Orders shall have the same meaning as defined in ORC Chapter 3704 and the rules promulgated thereunder.

IV. FINDINGS

The Director of Ohio EPA makes the following findings:

1. Respondent owns and operates an integrated steel plant located at 1807 E. 28th Street, Lorain, Lorain County, Ohio ("Facility"). On May 30, 2003, a Title V permit (02-47-08-0229) was issued to Respondent for the Facility pursuant to Ohio Administrative Code ("OAC") Chapter 3745-77. The Title V permit establishes terms and conditions under which the emissions units ("EUs") at the Facility are to be operated in order to ensure compliance with state and federal air pollution control laws and regulations. The Title V permit expired on June 20, 2008; however, its requirements remain in effect pursuant to OAC Rule 3745-77-08(E)(1) until a renewal Title V permit is issued by Ohio EPA. A renewal permit application was timely submitted by Respondent to Ohio EPA on December 20, 2007.

2. Respondent's Title V permit, in part, establishes emission limitations, operational controls and reporting requirements for the bloom reheat furnace, which is identified by Ohio EPA as EU P081 and has a heat input capacity 421.6 million British thermal units per hour ("MMBtu/hr"). Specifically, Part III.A.I.1. of the terms and conditions of the Title V permit establishes a nitrogen oxide ("NOx") emissions limitation of 0.132 pound of NOx per million British thermal units ("lb/MMBtu"). In addition, Part III.A.V.1.a. of the terms and conditions of the Title V permit requires Respondent to conduct an annual emission test for EU P081 in order to demonstrate compliance with allowable mass emission for NOx. EU P081 is an "air contaminant source" as defined in OAC Rule 3745-15-01(C) and (W). EU P081 is equipped with low NOx burners.

3. On November 13, 2007, Respondent conducted the 2007 annual emission test for EU P081. The average emissions of NOx based on these three, one-hour test runs was 0.141 lb/MMBtu, in violation of Part III.A.I.1. of the terms and conditions of the Title V permit and ORC § 3704.05(J)(2). On December 20, 2007 and February 6, 2008, Respondent tried to conduct retests of EU P081 but cancelled the retests both times because preliminary data indicated high emissions readings for NOx. On January 21, 2008, Respondent submitted, to Ohio EPA, a compliance plan. By letters dated January 2, 2008 and March 12, 2008, Ohio EPA notified Respondent of the continued violations of the NOx emission limitation for EU P081.

4. By April 8, 2008, Respondent made all necessary repairs to EU P081 and conducted and passed a retest. The average emissions of NOx based on these three, one-hour test runs was 0.044 lb/MMBtu. Respondent was in violation of Part III.A.I.1. of the terms and conditions of the Title V permit and ORC § 3704.05(J)(2) from November 13, 2007 until April 8, 2008. By letter dated June 17, 2008, Ohio EPA issued a return to compliance letter to Respondent for this Facility.

5. On November 12, 2008, Respondent conducted the 2008 annual emission test for EU P081. The average emissions of NOx based on these three, one-hour test runs was 0.230 lb/MMBtu, in violation of Part III.A.I.1. of the terms and conditions of the Title V permit and ORC § 3704.05(J)(2). By December 19, 2008, Respondent made all necessary repairs to EU P081 and conducted a retest. The results of the retest were 0.065, 0.068 and 0.056 lb/MMBtu. The average emissions of NOx based on these three, one-hour test runs was 0.063 lb/MMBtu. Respondent was in violation of Part III.A.I.1. of the terms and conditions of the Title V permit and ORC § 3704.05(J)(2) from November 12, 2008 until December 19, 2008. By letter dated April 17, 2009, Ohio EPA issued a return to compliance letter to Respondent for this Facility.

6. The Director has given consideration to, and based his determination on, evidence relating to the technical feasibility and economic reasonableness of complying with the following Orders and their relation to benefits to the people of the State to be derived from such compliance.

XI. RESERVATION OF RIGHTS

Ohio EPA and Respondent each reserve all rights, privileges and causes of action, except as specifically waived in Section XII of these Orders.

XII. WAIVER

Respondent hereby waives the right to appeal the issuance, terms and conditions, and service of these Orders, and Respondent hereby waives any and all rights Respondent may have to seek administrative or judicial review of these Orders either in law or equity.
