Subject: Failure to Sample Drinking Water for Total Coliforms as Required

Kings Island is in violation of Ohio Administrative Code (OAC) Rule 3745-81-21 for failure to comply with the total coliform monitoring.

Monitoring Period: September 2012
Required Coliform Monitoring: 30 routine per month
Sample Results Submitted: 29

To ensure the safety of drinking water provided by your system, monitoring for total coliforms is essential.

ACTION REQUIRED:

- 1. Notify the people served by this water system** using one or more of the methods and the timing as required by OAC Rule 3745-81-32 to reach all persons served.

Timing: As soon as practical, but no later than 30 days after learning of the violation:

- Posting in conspicuous locations, such as bulletin boards, restrooms, drinking fountains, vending areas;
- Mail or other direct delivery to each customer;
- Newsletters or newspaper;
- Email to employees or students;
- Send to parents or guardians of children at schools or day care facilities;

- Posted notices must remain in place as long as the violation or situation exists, but in no case less than seven days (even if the violation is resolved). The language in italics on the enclosed public notice is mandatory and must be included, as written. Do not make changes to the public notice without consulting with the Ohio EPA beforehand.

2. Complete the enclosed Verification Form within 10 days of issuing the Public Notice and mail it to Ohio EPA, Southwest District Office. Include a copy of each notice distributed, publishing or posted.

If total coliform samples were collected as required, submit the results as soon as possible. The monitoring violation would be rescinded and a reporting violation given for late submittal of the results.

If you have any questions, please contact me at (937) 285-6417.

Sincerely,

PUBLIC NOTICE - DRINKING WATER WARNING

Monitoring requirements were not met for Kings Island

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not your drinking water meets health standards. During September 2012, we "did not monitor or test" or "did not complete all monitoring or testing" for total coliform bacteria, and therefore cannot be sure of the quality of your drinking water during that time.

What Should I Do?

- *There is nothing you need to do at this time. You do not need to boil your water or take other corrective action.*
- *This notice is to inform you that Kings Island did not monitor and report results for the presence of total coliform bacteria in the public drinking water system during the September 2012 time period as required by the Ohio Environmental Protection Agency.*

What is being done?

Upon being notified of this violation, the water supply was required to have the drinking water analyzed for the above mentioned parameters. The water supplier will take steps to ensure that adequate monitoring will be performed in the future.
