COMPLIANCE EVALUATION INSPECTION

NOTICE OF VIOLATION

CERTIFIED MAIL

Mr. Phillip Bevington, Director of Services
Manchester School Administration Office
6075 Manchester Road
Akron, OH 44319

Dear Mr. Bevington:

On September 22, 2011, a Compliance Evaluation Inspection (CEI) was conducted at the Wastewater Treatment Plant (WWTP) serving the Manchester Administration Office Building. The WWTP is located across and down the street at the Lockhart Field. According to our files, the WWTP consists of anaerobic digestion, dosing pumps and two (2) surface sand filters. This treatment system does not meet today's Best Available Technology.

During the inspection, it was noted that there was only one distribution arm proceeding to one of the surface sand filters. The second distribution arm, proceeding to the second sand filter, shall be replaced immediately. The sand filters need additional sand with the appropriate specifications.

Also, it was noted that you are in non-compliance with your National Pollutant Discharge Elimination System (NPDES) permit's Compliance Schedule. The Compliance Schedule required construction of a WWTP upgrade by June 1, 2009. That upgrade was to consist of at a minimum: trash trap, extended aeration, surface sand filters, chlorination and dechlorination. In order to avoid escalated enforcement action being commenced by this office, it is required that you immediately send this office a written update of your intentions.

A review of the electronic Discharge Monitoring Reports (eDMRs) submitted for the WWTP from September 2010 through September 2011 revealed that the effluent sampling which is required by your NPDES permit is not being conducted. This legally required effluent monitoring and reporting shall commence immediately. Please explain in writing the reasons for this non-compliance.

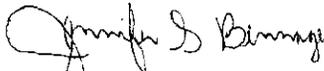

Lastly, your current NPDES permit is due to expire on May 31, 2012. The renewal application forms are due 180 days prior to the expiration date. Therefore, please submit the enclosed NPDES renewal application Forms 1, 2E, and 2S, the Antidegradation Addendum, the Operator
