Notice of Violation/Return to Compliance
OHD 005 034 194

December 30, 2008

Ms. Melissa J. Henderson, Human Resource Manager
BRP Manufacturing Company
637 North Jackson Street
Lima, Ohio 45802-0389

Dear Ms. Henderson:

Thank you and John Stein for accompanying me during the Ohio Environmental Protection Agency's (Ohio EPA) December 19, 2008, hazardous waste compliance evaluation inspection of BRP Manufacturing Company (BRP) located at the address stated above. I inspected BRP to determine its compliance with Ohio's hazardous waste laws as found in Chapter 3734. of the Ohio Revised Code (ORC) and Chapter 3745. of the Ohio Administrative Code (OAC). This inspection consisted of a facility walkthrough and paperwork review. Pollution prevention options were also discussed during this inspection. This letter will list the violations found during the inspection.

BRP is a manufacturer of rubber products for military, automotive, truck, marine, engine and commercial customers. BRP manufactures sheet rubber in different thicknesses. BRP manufactures rubber through a batch process which is then made into sheets by heavy hydraulic presses. Although most of the hydraulic oil from the presses has been replaced with water, several machines still use the hydraulic oil. Used oil is generated during the maintenance of the presses and from the inadvertent leaks from the machines during their operation. A used oil and water mixture is run through an oil and water separator and containerized in two large totes prior to being picked up by Crystal Clean. BRP also generates spent solvent (D001) from the final cleaning of the rubber prior to being packaged and shipped to the customer. According to the U.S. EPA database, BRP is listed as a small quantity generator of hazardous waste. During the inspection, you stated that BRP closed down its rubber hose manufacturing line back in 2002. In this operation BRP generated sufficient spent solvent to be qualified as a small quantity generator of hazardous waste. Since then, BRP has and continues to operate as a conditionally exempt small quantity generator of hazardous waste.

During the inspection, I provided you with the following materials: Universal Waste, December, 2004; and Universal Waste Rules for Handlers of Lamps, June 2005. I am enclosing the following document: The Regulation of Used Oil: An Overview for Ohio Businesses Who Generate Used Oil, April, 2006.

During the inspection, I found the following violations of Ohio's hazardous waste laws. BRP has abated these violations as summarized below:

1. **OAC Rule 3745-273-13(D)(1): Storage container requirements for universal waste lamps**

A small quantity handler of universal waste must manage lamps in a way that prevents releases to the environment. Lamps are required to be stored in containers that must remain closed at all times.

BRP failed to keep universal waste storage containers closed.

On December 22, 2008, you emailed me a digital photograph showing that all universal waste containers had been properly closed. ***This violation has been abated.***

2. **OAC Rule 3745-273-14(E): Storage container for universal waste lamps – Labeling**

A small quantity handler of universal waste must label each lamp or container clearly with one of the following phrases: "Universal Waste Lamp(s)" or "Waste Lamp(s)" or "Used Lamp(s)."

BRP failed to label spent lamps containers as described above.

On December 22, 2008, you emailed me a digital photograph showing that all universal waste containers had been properly labeled. ***This violation has been abated.***

3. **OAC Rule 3745-279-22(C)(1): Used oil storage containers – Labeling**

Containers, aboveground tanks and fill pipes used for underground storage tanks shall be labeled or marked clearly with the words "Used Oil."

Totes storing used oil were not properly labeled with the words "Used Oil."

BRP labeled the totes with the words "Used Oil" during the inspection. ***These violations have been abated.***

The Division of Hazardous Waste Management has created an electronic news service to provide you with quick and timely updates on events and news related to hazardous waste activities in Ohio. If you haven't already, we encourage you to sign up for this free service. You can find more information at <http://www.epa.state.oh.us/dhwm/listserv.html>. Please feel free to share this information with your colleagues.

As we discussed during the inspection, you may be able to reduce the waste your company generates. If you find ways to recycle, reduce or altogether eliminate the amount of waste that your company generates you may be able to reduce your treatment and disposal costs. Thus, you may possibly reduce your regulatory requirements. Ohio EPA has helpful information about pollution prevention at the following web address: <http://www.epa.state.oh.us/ocapp/ocapp.html>.

Enclosed you will find a copy of the checklists that were completed during the inspection. You can find copies of the rules and other information on the division's web page at <http://www.epa.state.oh.us/dhwm>.
