Notice of Violation**

April 6, 2007

Mr. Brett Anderson
Fort Amanda Specialties LLC
1747 Fort Amanda Road
Lima, Ohio 45804-1864

Dear Mr. Anderson:

Thank you and Jeff Wilson for accompanying Colleen Weaver, Chris Maslo, and me during the Ohio Environmental Protection Agency's (Ohio EPA's) March 7, 2007, inspection of Fort Amanda Specialties LLC's (Fort Amanda's) facility in Lima, Ohio. Colleen Weaver and Wendy Miller revisited your facility on March 14, 2007, to review additional paperwork. We inspected Fort Amanda to determine its compliance with Ohio's hazardous waste laws as found in Chapter 3734. of the Ohio Revised Code (ORC) and Chapter 3745. of the Ohio Administrative Code (OAC). During the inspection, we also helped you identify ways to prevent pollution by reducing waste. This letter will explain the violations we found, what you need to do to correct the violations, other general concerns we have, what you need to do to respond to our general concerns and the pollution prevention opportunities we identified.

We found the following violations of Ohio's hazardous waste laws. In order to correct these violations you must do the following and send me the required information **within 30 days** of your receipt of this letter:

- OAC Rule 3745-279-22 (C)(1), Used Oil Storage Requirements:** Containers used to store used oil shall be labeled or marked clearly with the words "Used Oil."

Fort Amanda failed to mark their used oil drums in the compressor room with the words "Used Oil." Fort Amanda marked the used oil drums with the words "Used Oil" while Ohio EPA was on site. **Therefore, this violation has been abated.**
- OAC Rule 3745-273-14 (E), Universal Waste Storage Requirements:** Fort Amanda failed to mark the containers holding their fluorescent bulbs with the words "Universal Waste-Lamps."

Fort Amanda must label the appropriate containers with the words "Universal Waste-Lamps."

Fort Amanda marked the appropriate containers with the words "Universal Waste-Lamps" while Ohio EPA was on site. **Therefore, this violation has been abated.**

3. **OAC Rule 3745-66-74, Less than 90 day Storage Inspections:** The owner or operator must inspect areas where containers are stored, at least weekly, looking for leaks and for deterioration caused by corrosion or other factors.

Fort Amanda failed to inspect the less than 90 day hazardous waste storage area on a weekly basis on the following dates: December 21, 2004; May 17, 2005; November 22, 2005; and March 28, 2006.

In order to correct this violation, Fort Amanda must immediately begin inspecting the storage areas every seven (7) days. Fort Amanda must also write a plan outlining how Fort Amanda will ensure that inspections are completed every seven (7) days. This plan must be submitted to Ohio EPA along with copies of two (2) weeks of inspection logs for the storage areas.

4. **OAC Rule 3745-66-95 (A) (1-4), Tank Inspections:** The owner or operator must inspect, where present, at least once each operating day: (1) Overfill/spill control equipment to ensure that it is in good working order; (2) The aboveground portions of the tank system, if any, to detect corrosion or releases of waste; (3) Data gathered from monitoring equipment and leak-detection equipment to ensure that the tank system is being operated according to its design; and (4) The construction materials and the area immediately surrounding the externally accessible portion of the tank system including secondary containment structures to detect erosion or signs of releases of hazardous waste.

Fort Amanda failed to inspect the tank system daily on the following dates: May 24, 2006; and May 27, 2006; and for the following items:

- a) 3745-66-95 (A)(1) Fort Amanda failed to inspect overfill/spill control equipment daily;
- b) 3745-66-95 (A)(2) Fort Amanda failed to inspect the above ground portions of the tank system daily;
- c) 3745-66-95 (A)(3) Fort Amanda failed to inspect data gathered from monitoring equipment and leak detection equipment daily;
- d) 3745-66-95 (A)(4) Fort Amanda failed to inspect the area immediately surrounding the tank system including the secondary containment daily.

Mr. Brett Anderson

Page 3

In order to correct this violation, Fort Amanda must immediately begin inspecting the tank every operating day. Fort Amanda must also write a plan outlining how Fort Amanda will ensure that inspections are completed every day. This plan must be submitted to Ohio EPA along with copies of one (1) week of inspection logs for the tank system.

5. **OAC Rule 3745-65-16 (C), Personnel Training:** Facility personnel must take part in an annual review of the initial training required.

Fort Amanda failed to complete annual refresher training for personnel (e.g. Jon Cox completed training on April 27, 2004; January 25, 2005; and March 17, 2006).

In order to correct this violation, Fort Amanda must immediately conduct annual refresher training for those individuals that manage hazardous waste. Fort Amanda must document this training and submit a plan to Ohio EPA that outlines how Fort Amanda will ensure that this annual training will not exceed 365 days between courses as Ohio EPA defines annual as once every 365 days.

General Concerns

According to the hazardous waste coding on the manifests and your annual report, the laboratory titration waste with silver is coded as D002, D003, D011, and the laboratory clean up waste from titration with silver is coded as D002, D007, D011. Ohio EPA recommends that Fort Amanda analyze the laboratory titration waste with silver to determine what characteristics. During the last inspection by Ohio EPA, your facility determined that only the D002 and D011 waste codes applied to this waste, and according to Jeff Wilson, that process has not changed. Please forward your analytical or waste evaluation to me to include in our records.

As we discussed during the inspection, you may be able to reduce the waste your company generates. If you find ways to recycle, reduce or altogether eliminate the amount of waste that your company generates you may be able to reduce treatment and disposal costs. After the inspection we sent you recycling information for the lithium batteries that you generate. Ohio EPA also has helpful information about pollution prevention at the following web address: <http://www.epa.state.oh.us/ocapp/ocapp.html>. If you would like to be considered for an in-depth on-site pollution prevention assessment, or if you would like more information about pollution prevention assessments, please contact me at (419) 373-3065.

The Division of Hazardous Waste Management has created an electronic news service to provide you with quick and timely updates on events and news related to hazardous waste activities in Ohio. If you haven't already, we encourage you to sign up for this free service. You can find more information at the following web site: www.epa.state.oh.us/dhwm/listserv.html. Please feel free to share this with your colleagues.
