Re: RTH Processing, Inc.

Hazardous Waste
Notice of Violation/Partial Return to
Compliance

August 26, 2010

Mr. Ted Horstman
RTH Processing, Inc.
1430 North Main Street
Delphos, Ohio 45833

Dear Mr. Horstman:

On August 16, 2010, Wendy Miller and I conducted a compliance evaluation inspection at RTH Processing, Inc. (RTH) located in Delphos, Ohio. We inspected RTH to determine its compliance with Ohio's hazardous waste laws as found in Chapter 3734 of the Ohio Revised Code (ORC) and Chapter 3745 of the Ohio Administrative Code (OAC). Pollution prevention options were also discussed during this inspection. This letter will explain the violations found and what you need to do to correct these violations.

RTH recycles scrap rubber from manufacturing facilities (i.e. Goodyear, Tenneco) by grinding it into particle size and using it to make items such as: sporting mats, athletic tracks, and playground safety surfaces. RTH recycles the scrap rubber tailings generated from the process back into the process. RTH uses polyurethane as an adhesive to hold the rubber particles together. Polyurethane and rubber particles are mixed and poured into a cylinder compression mold where the mixture hardens into a solid cylinder of product. The cylinders are then cut to different thicknesses depending on the customer order specifications. Pre-packaged, powdered, food grade dyes are added to off-spec virgin EPDM (ethylene propylene diene monomer) rubber to make colored particles for use in the process.

Used oil is generated from the maintenance of the forklift motors and occasionally from the maintenance of the manufacturing equipment. The used oil is stored in 55-gallon drums and picked up for recycling by Interdyne. Spent fluorescent lamps are managed as a solid waste. At the time of our inspection, RTH was operating as a non-generator of hazardous waste.

We found the following violations of Ohio's hazardous waste and used oil laws. In order to correct these violations you must do the following and send me the required information within 30 days of your receipt of this letter:

1. Waste Evaluation, OAC Rule 3745-52-11:

RTH failed to have waste evaluation documentation or an established recycling plan in place for the fluorescent bulbs generated at the facility.

Mr. Ted Horstman

Hazardous bulbs are considered "spent materials" and remain hazardous waste even when recycled. Hazardous waste lamp generators have the option of handling their lamps as hazardous waste or as universal waste. Managing hazardous waste lamps under the universal waste rules eases certain regulations imposed on generators of spent lamps.

Please be aware that incandescent, fluorescent, metal halide, neon, high-intensity discharge, high-pressure sodium and mercury-vapor lamps could be hazardous waste when discarded. Fluorescent lamps may contain up to 40 milligrams (mg) of mercury, depending on the brand and manufacturer. Lamps may also contain lead and cadmium. Many lamps exhibit a characteristic of toxicity for heavy metals when disposed. A copy of Fluorescent Lamps: What You Should Know, was given to you at the time of our inspection. I recommend that you review this document and contact me if you have any questions.

RTH must submit to Ohio EPA documentation to demonstrate how you plan to properly manage your fluorescent bulbs. If RTH plans to manage the spent fluorescent bulbs when generated as universal waste, please submit the name of the facility where you plan to recycle the bulbs. Managing the spent fluorescent bulbs as universal waste eliminates the need for analytical testing.

RTH must also properly train employees, who handle or have responsibility for managing universal waste, on waste handling and emergency procedures relative to their responsibilities and send me documentation (memo or sign-in sheets) that this has been completed.

2. OAC Rule 3745-279-22(C)(1): Labeling:

Containers, aboveground tanks, and fill pipes used for underground storage tanks shall be labeled or marked clearly with the words "used oil."

RTH had two 55-gallon drums of used oil that were not properly labeled.

At the time of our inspection, RTH properly labeled the two 55-gallon drums with the words "used oil". A copy of the fact sheet, The Regulation of Used Oil: An Overview for Ohio Businesses Who Generate Used Oil, was given to you at the time of our inspection. Please review this information and contact me if you have any questions.

Therefore, this violation is considered abated.

Ohio EPA has helpful information about compliance assistance and pollution prevention at the following web address: <http://www.epa.ohio.gov/ocapp>. In addition, you can find copies of the rules and other information on the division's web page at: <http://www.epa.ohio.gov/dhwm/>.

Enclosed you will find a copy of the checklists that were completed during the inspection.
