**RE: Lane's Lube Express
Auglaize County
DHWM, NWDO
Complaint 2718
Notice of Violation**

December 27, 2007

Mr. Jack Lane, Junior
Lane's Lube Express
223 North Main Street
Bellefontaine, OH 43311

Dear Mr. Lane:

On December 4, 2007, Amy Heller and I investigated a complaint at Lane's Lube Express (LLE) located at 105 Schwieterman Street, New Bremen, Ohio. According to the complaint received by the Ohio Environmental Protection Agency (Ohio EPA), the complainant alleged that LLE stores their used oil filters in a wooden trailer and the oil leaks through the trailer floor and onto the grass behind the trailer. The complainant is concerned because the facility is located next to a canal and this practice has been happening for a month. This letter will explain the validity of the complaint, the violation found at the facility, what should be done to correct the violation, other general concerns found at the facility, and what you need to do to respond to our concerns.

LLE operates a quick, drive-in automotive oil changing facility. Used oil is generated at this facility.

Complaint

Upon Ohio EPA's arrival to the site, we spoke with David Lane. He stated that used oil filters are punctured, drained, crushed, and stored in drums. He showed us the drum of used oil filters in the basement and a few oil filters that were draining. David stated that the used oil filters are disposed of in the local landfill and gave us permission to walk around the property.

Mr. Jack Lane
December 27, 2007
Page Two

While on site, Ohio EPA observed an area located in the rear of the facility where a wooden trailer was located. The trailer contained an old appliance. The wooden bottom of the trailer was stained with a black material and several crushed oil filters were found underneath the trailer. Black staining was also found in the grass area directly behind the trailer.

When questioned about the trailer, David told us that it belonged to an employee that was trying to earn extra money by recycling old appliances and other valuable items.

From the conversation with David it appears that sometimes the employee that owns the trailer takes the used oil filters to be recycled. This is a good practice that Ohio EPA recommends. However, it appears that the drum containing the used oil filters is not placed directly on the trailer but the used oil filters are dumped onto the trailer which allows used oil to escape from the filters and run onto the grass. Ohio EPA recommends that LLE place the entire drum of filters onto the trailer to be hauled to the recycler and that LLE receives a receipt from the recycling of the used oil filters. This will ensure that they are being properly managed by LLE.

Violation

As a result of the complaint investigation, Ohio EPA found the following violation of Ohio's used oil regulations:

- 1. Ohio Administrative Code (OAC) Rule 3745-279-22 (D), Used Oil Requirements for Generators:** "Response to releases. Upon detection of a release of used oil to the environment that is not subject to the requirements of Chapter 1301:7-9 of the Administrative Code and which has occurred after October 20, 1998, a generator must perform the following cleanup steps: (1) Stop the release; (2) Contain the released used oil; (3) Clean up and manage properly the released used oil and other materials; and (4) If necessary, repair or replace any leaking used oil storage containers or tanks prior to returning them to service."

LLE failed to clean up and properly manage the used oil and other materials located by the wooden trailer in the rear of the property.

To abate this violation, LLE must immediately begin properly cleaning up used oil releases in a timely manner.

Mr. Jack Lane
December 27, 2007
Page Three

LLE must clean up all visible contamination located by the wooden trailer in the rear of the property. This material shall be placed in containers in good condition prior to disposal.

In order for LLE to determine whether the contaminated soils and cleanup materials exhibit any hazardous waste characteristics, LLE must obtain a chemical analysis of a representative sample of the contaminated soil. LLE will need to contract the services of an environmental laboratory to analyze this material. LLE must at least determine the concentrations of the Resource Conservation and Recovery Act (RCRA) metals in the waste.

Based on the results of the analytical test(s), LLE shall label the container(s) appropriately and dispose of the wastes at a proper disposal facility.

LLE shall submit the analytical results indicating the proper evaluation of the contaminated soil, appropriate manifest documents or shipping papers indicating proper disposal of the contaminated soil and cleanup materials, and pictures indicating the releases have been cleaned up to Ohio EPA **within 30 days of receipt of this letter**. The results must document if the waste is hazardous or not and whether it is restricted from land disposal. If the waste is hazardous, LLE must explain what treatment, storage, or disposal facility the waste will be sent to.

If the waste is hazardous, I will determine the status of your compliance with other hazardous waste laws and notify you of my findings in a separate letter.

Please notify me at least five days prior to taking the sample(s) so that I may be present.

In a phone conversation with you on December 20, 2007, you stated that the stained soil and grass was scraped up and placed in a bag. You also stated that oil dry had been used to clean up the contamination. When asked where the bag containing the oil contaminated soil was located, you stated that you were unsure if the bag had been disposed of in the landfill or was currently on the property. If the bag of contaminated soil was disposed of in the landfill, please submit the generator knowledge used in making the determination that the soil was a non-hazardous waste.

Mr. Jack Lane
December 27, 2007
Page Four

During our phone conversation, I requested that you photograph the area where the soil contamination was located to document that all visible contamination was removed. You agreed to send an electronic mail to me with this documentation.

General Concerns

- A. Wooden Trailer:** It appears that the wooden trailer does not belong to LLE. If this is true, then Ohio EPA recommends the trailer be removed from the property. This will decrease the chance that other complaints will be filed against LLE in the future.

For other valuable information, I have included the fact sheets titled The Regulation of Used Oil: An Overview for Ohio Businesses Who Generate Used Oil, April 2006; Universal Waste Rules for Handlers of Lamps, June 2005; and Universal Waste, December 2004. Please be advised that a full compliance evaluation inspection was not conducted at this facility. Ohio EPA's failure to list specific deficiencies or violations in this letter does not relieve you from having to comply with all applicable regulations.

Ohio EPA will issue an EPA ID number to track our inspection activity at LLE. LLE can not use this number for manifesting hazardous waste shipments. If LLE wants to use an EPA ID number for manifesting and other hazardous waste, used oil or universal waste activities, LLE must complete and submit a Notification of Regulated Waste Activity form (EPA Form 9029 (Rev. 11/2002)) to Ohio EPA. This form is available on our Web page at <http://www.epa.state.oh.us/dhwm/notiform.html> or LLE can call the Division of Hazardous Waste Management, Central Office, RIS at (614) 644-2977 and a copy will be sent through the mail.

The Division of Hazardous Waste Management (DHWM) has created an electronic news service to provide you with quick and timely updates on events and news related to hazardous waste activities in Ohio. If you haven't already, we encourage you to sign-up for this free service. You can find more information at the following Web link <http://www.epa.state.oh.us/dhwm/listserv.html>. Please feel free to share this information with your colleagues.

You can find copies of the rules and other information on the division's web page at <http://www.epa.state.oh.us/dhwm>. Ohio EPA has helpful information about pollution prevention at the following web address: <http://www.epa.state.oh.us/ocapp/ocapp.html>.

11. Waste Codes for Federally Regulated Hazardous Wastes: Please list the codes for the federally regulated hazardous waste handled at the site. List them in the order they are presented in the regulations (e.g., D001, D003, F007, U112). Use an additional page if more space is needed. If there are more than 7 waste codes and they are the same as listed in the most recent RCRAInfo source record, you do not need to list them all. Instead just indicate the date of the most recent source record.			
12. Comments: Use this area to describe whether the inspection was announced, whether the waste is stored in tanks or containers, etc.			
Announced	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	Additional Facility Representatives:	Jason (last name unknown)
Tanks	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	Other Comments: The site city and zip code may not be correct. This location does not have a P.O. Box, and therefore does not have a mailing address. I spoke with the post office in New Bremen and this area is the boundary for New Bremen and Minster post offices. The city and zip code could be Minster, OH 45865. I currently have it labeled as a New Bremen address.	
Containers	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
