Hazardous Waste
Notice of Violation

August 27, 2009

Mr. Henry Hoskins, Owner
WeldTec Inc.
1880 Celina Road
St. Marys, Ohio 45885

Dear Mr. Hoskins:

Thank you for accompanying me during Ohio EPA's August 19, 2009, compliance evaluation inspection of WeldTec Inc. (WT) located at 1880 Celina Road in St. Marys, Ohio. I inspected WT to determine its compliance with Ohio's hazardous waste laws as found in Chapter 3734. of the Ohio Revised Code (ORC) and Chapter 3745. of the Ohio Administrative Code (OAC). My inspection included observations of facility operations and a review of written documentation.

WT is a production welding shop that manufactures racks for the automotive industry. Some of the products are painted. WT is operating as a conditionally exempt small quantity hazardous waste generator. WT generates the following wastes:

1. Paint Waste (F003 & F005): Finished products are often painted. First the racks are power washed to prepare them for painting. Painting is done with a spray gun. The waste consists of cleanup solvent and bad paint. The solvents used for cleaning spray equipment include: toluene, xylene, trimethylbenzene and cumene. WT generates approximately one 55-gallon drum of this waste every two years and ships it off-site through Univar USA Inc. in Fort Wayne, Indiana.
2. Used Oil: WT generates a very small amount of used oil from maintenance of their trucks. It is accumulated in a 55-gallon drum and is recycled through Belna Petroleum.
3. Universal Waste Lamps: WT occasionally accumulates spent lamps that are recycled.

As a result of my inspection, I found the following violations of Ohio's hazardous waste laws. In order to correct these violations, you must do the following and send me the required information, **within 30 days** of your receipt of this letter:

1. **Used Oil Container, Labeling**
OAC Rule 3745-279-22(C)(1)

Containers, aboveground tanks, and fill pipes for underground tanks used to store used oil at generator facilities must be labeled or marked clearly with the words "Used Oil."

On August 19, 2009, I observed one 55-gallon drum of used oil that was not marked with the words "Used Oil". In order to correct this violation, WT must immediately mark or label the used oil container with the words "Used Oil" and provide me with photographic documentation that this has been done.

**2. Universal Waste Labeling - Lamps
OAC Rule 3745-273-14(E)**

Each lamp or a container or package in which such lamps are contained must be labeled or marked clearly with one of the following phrases: "Universal Waste Lamps", "Waste Lamps" or "Used Lamps".

WT did not properly label four boxes of spent lamps with one of the required phrases. In order to correct this violation, WT must immediately mark or label the boxes with one of the required phrases and provide me with photographic documentation that this has been done.

**3. Accumulation Time for Universal Waste Lamps
OAC Rule 3745-273-15(C)**

A small quantity handler of universal waste who accumulates universal waste shall be able to demonstrate the length of time that the universal waste has been accumulated from the date it becomes a waste or is received.

WT was not able to demonstrate the length of time the universal waste lamps were accumulated. In order to correct this violation, WT must immediately date each of the boxes and provide me with photographic documentation that this has been done.

Please be aware that incandescent, fluorescent, metal halide, neon, high-intensity discharge, high-pressure sodium and mercury-vapor lamps could be hazardous waste when discarded. Fluorescent lamps may contain up to 40 milligrams (mg) of mercury, depending on the brand and manufacturer. Lamps may also contain lead and cadmium. Many lamps exhibit a characteristic of toxicity for heavy metals when disposed. During the inspection, I gave you copies of the following documents, to assist you in properly managing your spent lamps: Fluorescent Lamps: What You Should Know and Computer, Fluorescent Lamp and Ballast Recyclers. I recommend that you review these documents carefully and contact me if you have any questions. The first document describes the rules you must follow in order to manage lamps as a universal waste.

As a used oil generator you are required to store used oil in containers or aboveground tanks that are in good condition (no severe rusting, apparent structural defects or deterioration) and not leaking. Containers, aboveground tanks and fill pipes for underground tanks must be labeled with the words "Used Oil."

Page 3

If leaks are detected, the generator must: stop the release; contain the release; clean up and manage properly the released used oil and other materials related to the release; and, if necessary, repair or replace any leaking containers or tanks prior to returning them to service. During the inspection I gave you copies of the following used oil fact sheets: The Regulation of Used Oil: An Overview for Ohio Businesses Who Generate Used Oil, and Used Oil Recyclers. Please review these carefully and contact me immediately if you have any questions.

You may be able to further reduce the waste your company generates. If you find ways to recycle, reduce or altogether eliminate the amount of waste that your company generates you may be able to reduce your treatment and disposal costs and you may possibly reduce your regulatory requirements. During the inspection, I gave you a copy of Pollution Prevention Opportunities, a worksheet that can help you recognize opportunities for reducing waste and conserving energy at your business. I also gave you a copy of the fact sheet Management of Electronic Waste from Businesses. Please review this information and contact me if you have any questions.

I encourage you to schedule a pollution prevention assessment for your business because there are often many opportunities for businesses like yours to reduce waste and save money. If you wish to talk about an assessment or if you have other questions about pollution prevention, please feel free to contact the Office of Compliance Assistance and Pollution Prevention (OCAPP) at (614) 644-3469. There is no charge for an assessment.

The Division of Hazardous Waste Management has created an electronic news service to provide you with quick and timely updates on events and news related to hazardous waste activities in Ohio. If you haven't already, we encourage you to sign-up for this free service. You can find more information at <http://www.epa.state.oh.us/dhwm/listserv.html>. Waste Codes for Federally Regulated Hazardous Wastes. Please list the codes for the federally regulated hazardous waste handled at the site. List them in the order they are presented in the regulations (e.g., D001, D003, F007, U112). Use an additional page if more space is needed. If there are more than 7 waste codes and they are the same as listed in the most recent RCRAInfo source record, you do not need to list them all. Instead just indicate the date of the most recent source record.
