RE: GEAUGA COUNTY
BEAVER CREEK ESTATES
COMMUNITY WATER SYSTEM
PWS ID #OH2800012

Mr. Robert Steinberg
P.O. Box 902
Chesterland, OH 44026

SUBJECT: NOTICE OF VIOLATION FOR CHLORINE SAMPLING

Dear Mr. Steinberg:

On November 15, 2012, this office received the *October 2012 Monthly Operating Report (MOR form 5002)* from Beaver Creek Estates. The MOR is provided as a means to relay compliance information about the operation of the water treatment plant. Operational monitoring is conducted throughout the month to test the treatment effectiveness of the water plant. Since Beaver Creek Estates treats its water by chlorine injection (disinfection), you are required to conduct monitoring for chlorine residuals.

Please note the following violation:

OAC Rule 3745-83-01(F)(2) requires either 1) free chlorine residual or 2) combined chlorine residual to be measured

- 1) At the plant tap,
- 2) At a representative point in distribution, and
- 3) Measured every day that water is being produced.

Currently, your public water system is not collecting free chlorine residual and combined chlorine residual samples at the plant tap every day that water is being produced. In the October 2012 monthly operating report, chlorine was only analyzed eight days at the plant tap. The system has not been analyzing chlorine at the plant tap every day that water was being produced since at least 2010. **Begin immediately to collect free chlorine residual or combined chlorine residual at the plant tap every day that water is being produced, to avoid**

notices of violation. Please note that the chlorine samples do not have to be collected by the designated operator. Chlorine samples may be collected by the owners, or a resident within the mobile home park.

If you have any questions regarding this correspondence, or if you need any assistance, please contact me at (330) 963-1149 or at my e-mail address, kathy.metropulos@epa.state.oh.us.

Sincerely,

Kathy Metropulos
