**Re: NOTICE OF VIOLATION OF OHIO ADMINISTRATIVE CODE 3745-19-03;
unauthorized illegal open burning in a restricted area; Repeat Violation - Significant**

The Canton City Health Department, Air Pollution Control Division (APCD) represents the Ohio EPA in air quality matters within Stark County. As such, APCD employees have the authority to investigate and enforce Ohio EPA air pollution regulations.

On Friday, June 8, 2012, the Canton Fire Department responded to a call at this address in which you were burning plastic and yard waste. On Friday, June 15, 2012, the Canton Fire Department again responded to a call at this address in which you were burning construction debris. Representatives of this office visited your residence to investigate these complaints and spoke to you regarding the open burning regulations. A Notice of Violation dated July 16, 2012 was mailed to you for these incidents.

On Wednesday, October 28, 2012 at 0254 hrs, Canton Fire Department Truck 8 was again at your address to investigate unauthorized burning. As explained in person and in the Notice of Violation mailed to you four months ago, since this property is located in what the Ohio Administrative Code (OAC) 3745-19-01(K) defines as a restricted area, OAC 3745-19-03(B) allows the following without notification to or permission from the Ohio EPA; bonfires, campfires and outdoor fireplace equipment, whether for cooking food for human consumption, pleasure, religious, ceremonial, warmth, recreational, or similar purposes, if the following conditions are met:

- (a) They are fueled with clean, seasoned firewood, natural gas or equivalent, or any clean burning fuel with emissions that are equivalent to or lower than those created from the burning of seasoned firewood;
- (b) They are not used for waste disposal purposes; and
- (c) They shall have a total fuel area of three feet or less in diameter and two feet or less in height.

On Tuesday, November 6, 2012 at approximately 10:40 a.m., I visited your home and observed the burn area, which was approximately four feet in diameter and contained partially burned pet furniture. A piece of burned plastic debris was also found near the burn area. You were not home so my business card was left at your front door. Photographs were taken during my inspection and are

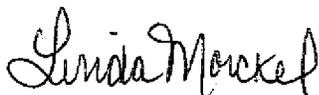

attached for your review. Since these items do not constitute clean, seasoned firewood, the fire was used for waste disposal, and the burn area is more than three feet in diameter, this is a violation of OAC 3745-19-03(B). I am enclosing a copy of OAC Rule 3745-19-03 for your reference. Canton City has stricter rules on outdoor fires. I am also enclosing a copy of Canton City's fire ordinance.

Burning household waste produces many toxic chemicals and is one of the largest known sources of dioxin in the nation. Other air pollutants from open burning include particulate matter, sulfur dioxide, lead and mercury. These pollutants have been linked to several health problems, including asthma, respiratory illnesses, nervous system damage, kidney and liver damage, and reproductive or developmental disorders.

This agency requests your cooperation by ceasing any open burning in violation of Ohio EPA regulations. Be advised that the Ohio EPA does have the authority to penalize fines of up to \$250 per day to citizens for open burning violations, and does have the authority to request the attorney general to initiate legal action to seek additional penalties of up to \$25,000. This letter or information pursuant to this letter does not constitute a waiver of Ohio EPA's authority to seek civil penalties as provided in Section 3704.06 of the Ohio Revised Code. Ohio EPA will determine later whether to pursue such penalties in this case.

Please be advised that this office is forwarding all case-related information to Ohio EPA for further enforcement action.

Sincerely,

Linda Morckel
Monitoring & Inspections Technician, Air Pollution Control
