Revised Letter to Correct Allowable Emission Rates

Dear Mr. Loubiere:

On August 26, 2006, Almega Environmental, Inc. performed particulate, sulfur dioxide (SO₂), nitrogen oxides (NO_x), carbon monoxide (CO), and volatile organic compounds (VOC) emission compliance tests at Degussa Engineered Carbons, 11135 State Route 7, Belpre on the Central Stack dryers (Emissions Unit P005 and P006). Ohio EPA received the test report on October 23, 2006. The test report has been reviewed and we have concluded that the test was conducted according to the procedures specified in 40 CFR Part 60, Appendix A, U.S. EPA Test Method(s) 1-6, 7E, 10 and 25. The results of the test showed the source to be out of compliance with the applicable Ohio EPA regulations for SO₂ and NO_x emissions and your facility permit terms and conditions.

Our test review shows the following:

	Particulate	SO ₂	Nox	CO	VOC
A. Tested Emission Rate-lbs/hr:	5.4	316.3	64.1	13.8	1.3
B. Allowable Emission Rate-lbs/hr:	6.8	290.4	56.0	299.8	19.5
C. Source Operating Rate-lbs/hr:	17,570				
D. Isokinetic Rate:	Run #1 - 91.9%; Run #2 - 104%; Run #3 - 102%				

Please submit to this office, within 30 days of receipt of this letter, a plan and schedule for achieving compliance. Submit this plan to the attention of Michael Carper.

Acceptance by the Ohio EPA of a compliance plan and schedule does not constitute a waiver of the Ohio EPA's authority to seek civil penalties as provided in Section 3704.06 of the Revised Code. The determination to pursue or to decline to pursue such penalties in this case will be made by the Ohio EPA at a later date.

Mr. Donnie Loubiere
