Mr. John Stanberry
Plant Manager
Stewart Glapat Corp.
1639 Moxahala Ave.
Zanesville, Ohio 43701

Dear Mr. Stanberry:

On January 4, 2013, Scott Bergreen and I performed a compliance inspection of the Stewart Glapat Corp. facility to determine its compliance with Ohio's hazardous waste laws and regulations as found in Chapter 3734 of the Ohio Revised Code (ORC) and Chapter 3745 of the Ohio Administrative Code (OAC).

Based on our observations and review of facility documentation during this inspection, we found the following violations of the hazardous waste regulations. Please provide the requested information within twenty-one days of the date of this letter:

- (1) **OAC rule 3745-273-13(D) Waste management- standards for small quantity handlers of universal wastes.** Lamps. A small quantity handler of universal waste must manage lamps in a way that prevents releases to the environment as follows:
(1) A small quantity handler of universal waste must contain any lamp in containers or packages that are structurally sound, adequate to prevent breakage, and compatible with the content of the lamps.

During the inspection, we observed about a dozen 10 or 12 foot lamps stored without a container. To abate this violation, please provide photographs showing that all your spent lamps are stored in containers that are closed and adequate to prevent breakage.

- (2) **OAC rule 3745-273-14 Labeling/Marking standards for small quantity handlers of universal wastes.** A small quantity handler of universal waste must label or mark the universal waste to identify the type of universal waste as specified in this rule: (E) Each lamp or a container or package in which such lamps are contained must be labeled or marked clearly with any one of the following phrases: "Universal Waste – lamps" or "Waste Lamps," or "Used Lamps."

During the inspection, we observed used fluorescent lamps stored in a container which was not labeled or marked with the wording provided in this rule. To abate this violation, please provide photographs showing the containers properly labeled.

- (3) **OAC rule 3745-273-15(C) Accumulation time limits - standards for small quantity handlers of universal wastes.** A small quantity handler of universal waste may accumulate universal waste for no longer than one year from the date the universal waste is generated, or received from another handler, unless the requirements of paragraph B of this rule are met...if such activity is solely for the purpose of accumulation of such quantities of universal waste as necessary to facilitate proper recovery, treatment or disposal.

At the time of the inspection, Stewart Glapat was accumulating used lamps but could not demonstrate the time period or that they were accumulated for more than a year to facilitate proper recycling. To abate this violation, please provide documentation indicating how you will meet this requirement (e.g., memo stating that personnel will begin dating containers when the first lamp is placed into it).

Other Compliance Concerns:

As we discussed during the inspection, Stewart Glapat Corp. appeared to be operating as a small quantity generator of hazardous waste during the last three months of 2012 (ie. generated over 220 pounds per month – approximately 26 gallons). During the months your facility generates this amount or above, it must comply with the small quantity generator rules (I have attached a blank compliance checklist for your use). It is recommended that you keep a log of the amount of hazardous waste generated during each month so that you can be certain which of the three generator categories you fall under for each month.

Alternatively, you could potentially find ways to generate less waste and not have to worry about the additional regulations. I have attached a factsheet on ways to minimize paint waste generation. For more information on minimizing waste generation, you can contact our Office of Compliance Assistance and Pollution Prevention (their number is in the factsheet).

Stewart Glapat Corp. needs to immediately take the necessary measures to return to compliance with Ohio's environmental laws. **Within 21 days** of the date of this letter, you are requested to provide documentation to this office including the steps taken to abate the violations cited above. Documentation of steps taken to return to compliance includes written correspondence, updated policies, and photographs, as appropriate, and may be submitted via the postal service or electronically to rich.stewart@epa.ohio.gov.

Please be advised that violations cited above will continue until the violations have been properly abated. Failure to comply with Chapter 3734 of the Ohio Revised Code and rules promulgated thereunder may result in a civil penalty of up to \$10,000 per day for each violation. It is imperative that you return to compliance. If circumstances delay the

abatement of violations, you are requested to submit written correspondence of the steps that will be taken by a date certain to attain compliance.

If you have any questions, please call me at (740) 380-5278.

Sincerely,

Richard Stewart
District Representative
Division of Materials and Waste Management
