Mr. Ken Biller
Swanton Township
13410 Airport Highway
Swanton, Ohio 43558

Dear Mr. Biller:

Thank you for accompanying Melissa Boyers and me during the Ohio Environmental Protection Agency's (Ohio EPA's) July 2, 2010, hazardous waste compliance evaluation inspection of Swanton Township's Maintenance Building (hereafter referred to as Swanton Township) located at 13410 Airport Highway in Swanton, Ohio. We inspected Swanton Township to determine its compliance with Ohio's hazardous waste laws as found in Chapter 3734 of the Ohio Revised Code (ORC), and Chapter 3745 of the Ohio Administrative Code. Pollution prevention options were also discussed during this inspection. This letter will explain the violations found and what you need to do to correct the remaining violations.

Swanton Township generates used oil from truck maintenance. No other wastes are generated at this location, including hazardous waste.

The following violations of Ohio's hazardous waste rules were observed and noted during the inspection. In order to correct these violations you must do the following and send me the required information within 30 days of your receipt of this letter:

1. OAC Rule 3745-279-24, Used Oil - Off-Site Shipment:

Generators shall ensure that their used oil is transported only by transporters who have obtained an EPA identification number.

Swanton Township has been giving the used oil they generated (self-transporting) to a local resident.

Mr. Ken Biller

Page 2

Swanton Township must immediately cease giving used oil to any person or transporter who does not have an EPA identification number. To abate this violation, Swanton Township must notify Ohio EPA with how you plan to manage used oil in the future and provide the applicable documentation for review.

2. OAC Rule 3745-279-22(C)(1), Used Oil Labeling:

Containers, aboveground tanks, and fill pipes used for underground storage tanks shall be labeled or marked clearly with the words "used oil".

There was one drum located in the maintenance garage that was not properly labeled.

This violation was abated when the drum was labeled "used oil" during our inspection.

ADDITIONAL INFORMATION: FLUORESCENT BULBS

I have enclosed a fact sheet entitled, "Universal Waste Rules for Handlers of Lamps". Basically, when a lamp is spent (burned out) it must be managed as a waste. You can determine if it is hazardous or not by running analytical, however, we encourage you to recycle them.

By recycling the bulbs/lamps, the regulations allow for them to be managed as a universal waste. You do not need to analyze them but simply need to have them recycled. The requirements are that the bulbs are kept in a closed box or container labeled Universal Waste Lamps and that they are accumulated for less than one year. You must keep documentation showing that the bulbs have been recycled within the one year time frame. I have also enclosed a partial list of recyclers.

At the time of inspection, no lamps were being accumulated and no lamps had been disposed of or recycled recently. This rule applies to all of the Swanton Township buildings.

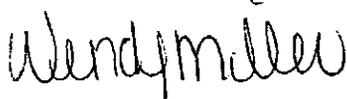

Enclosed you will find a copy of the checklists that I completed during the inspection. You can find copies of the rules and other information on the division's web page at <http://www.epa.ohio.gov/dhwm>. Ohio EPA also has helpful information about pollution prevention at the following web address: <http://www.epa.ohio.gov/opp>.

NOTE: A facility is subject to the federal SPCC regulations (40 CFR 112) if it is non-transportation related (e.g., fixed) and has an aggregate above ground storage capacity greater than 1,320 gallons or a total underground storage capacity greater than 42,000 gallons of oil (including used oil), and there is reasonable expectation of a discharge to navigable waters.

PROHIBITIONS

1.	Does the generator manage used oil in a surface impoundment or waste pile? If yes:	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> N/A <input type="checkbox"/>
a.	Is the surface impoundment or waste pile regulated as a hazardous waste management unit? [3745-279-12(A)]	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input checked="" type="checkbox"/>

NOTE: For example, used oil contaminated scrap metal stored in a pile.

2.	Is used oil used as a dust suppressant? [3745-279-12(B)]	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> N/A <input type="checkbox"/>
3.	Is off-specification used oil fuel burned for energy recovery in devices specified in 3745-279-12(C)?	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input checked="" type="checkbox"/>

NOTE: Multiple used oil checklists may be applicable if used oil handler is performing multiple tasks (e.g., if generating used oil and shipping directly to a burner, complete generator and marketer checklists at a minimum).

GENERATOR STANDARDS

4.	Does the generator mix hazardous waste with used oil? If so,	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> N/A <input type="checkbox"/>

Waste Codes for Federally Regulated Hazardous Wastes. Please list the codes for the federally regulated hazardous waste handled at the site. List them in the order they are presented in the regulations (e.g., D001, D003, F007, U112). Use an additional page or list them in the comments if more space is needed. If the waste codes are the same as listed in the most recent RCRAInfo source record, you do not need to list them. Instead just indicate the date of the most recent source record.
