Mr. Ron Charles
Sylvania Automotive
5403 Alger Road
Sylvania, Ohio 43560

Dear Mr. Charles:

Thank you for accompanying Melissa Boyers and me during the Ohio Environmental Protection Agency's (Ohio EPA's) July 16, 2009, hazardous waste compliance evaluation inspection of the Sylvania Automotive (SA) located at 5403 Alger Road in Toledo, Ohio. We inspected SA to determine its compliance with Ohio's hazardous waste laws as found in Chapter 3734 of the Ohio Revised Code (ORC), and Chapter 3745 of the Ohio Administrative Code(OAC). This letter will explain the violations found and what you need to do to correct the remaining violations if anything.

SA completes service work on vehicles. This includes brake and transmission service, etc. Wastes generated include a parts washer solution that is picked up by Safety Kleen every four months under the continued use program, used oil that is picked up by DISC, and universal waste fluorescent bulbs. You also have any shop rags laundered by Aramark.

The following violations of Ohio's hazardous waste rules were observed and noted during the inspection.

1. **Used Oil Labeling, OAC Rule 3745-279-22(C)(1)**

All tanks and containers holding used oil must be labeled with the words "used oil".

SA had one drum of used oil which was not labeled with the words "used oil".

During our inspection, the drum was labeled with the words "used oil", therefore, this violation is considered abated.

2. **Waste Evaluation, OAC Rule 3745-52-11**

SA failed to have waste evaluation documentation or an established recycling plan in place for the fluorescent bulbs generated at the facility. You stated that in the past, fluorescent bulbs were being put in the solid waste dumpster for disposal.

Hazardous bulbs are considered "spent materials" and remain hazardous waste even when recycled. Hazardous waste lamp generators have the option of handling their lamps as hazardous waste or as universal waste. Managing hazardous waste lamps under the universal waste rules eases certain regulations imposed on generators of spent lamps.

Please be aware that incandescent, fluorescent, metal halide, neon, high-intensity discharge, high-pressure sodium and mercury-vapor lamps could be hazardous waste when discarded. Fluorescent lamps may contain up to 40 milligrams (mg) of mercury, depending on the brand and manufacturer. Lamps may also contain lead and cadmium. Many lamps exhibit a characteristic of toxicity for heavy metals when disposed.

Page Two

During our inspection, you stated that you will begin recycling bulbs as universal waste through Gross Electric. We gave you a copy of our fact sheet, Universal Waste Rules for Handlers of Lamps, June 2005. Since there are no spent bulbs/lamps currently on-site and you have been informed of how to properly manage the bulbs, **this violation is considered abated.**

SA is currently a non-generator of hazardous waste. Ohio EPA will issue an EPA ID number to track our inspection activity at SA. SA cannot use this number for manifesting hazardous waste shipments. If SA wants to use an EPA ID number for manifesting and other hazardous waste, used oil or universal waste activities, SA must complete and submit a Notification of Regulated Waste Activity form (*EPA Form 9029 (Rev. 11/2002)*) to Ohio EPA. This form is available on our Web page for download at <http://www.epa.state.oh.us/dhwm/notiform.html> or you can contact the Division of Hazardous Waste Management, Central Office, RIS at (614)644-2977 and we will mail you a copy.

You can find copies of the rules and other information on the division of hazardous waste management web page at <http://www.epa.state.oh.us/dhwm>. Enclosed you will find a copy of the checklists completed during the inspection. Should you have any questions, please feel free to call me at (419)373-3114.

Sincerely,

Wendy A. Miller
