Subject: Rescinding Violation – TCR

Your public water system was issued a notice of violation of Rule 3745-81-21 of the Ohio Administrative Code (OAC) dated February 26, 2013, for the monitoring period of January 2013. The samples were collected on January 21, 2013, but the results were reported under the incorrect PWS ID Number. On March 1, 2013, the laboratory called our office and resolved this issue.

The Ohio EPA has assigned a specific public water supply identification number (PWS ID#) to each individual public water supply system located throughout Ohio. The purpose of this number is to match sample results with the correct system. Incorrect numbers may result in unnecessary violations. The PWS ID number for ODOT Rest Area 7-26 is #OH0632412. Use of this number on all correspondence and sample analyses is appreciated.

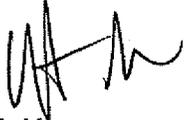

The violation has been rescinded and the public notice sent with the notice of violation referenced above does not need to be issued at this time.

OAC 3745-81-31 and 3745-89-08 require results to be reported by the tenth day following the month the sample was collected. Further, OAC 3745-89-08 requires the laboratory to report all positive, all repeat sample results and all samples required by OAC 3745-81-42 (Ground Water Rule) no later than the end of the next business day after the result was obtained. The samples were not reported in accordance with the above rules and this is considered a reporting violation.

Mr. John Horman
