# DRINKING WATER NOTICE

## Monitoring requirements not met for the MIBA BEARINGS LLC PWS

*We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not your drinking water meets health standards. During 2008 - 2010, we did not complete all monitoring or testing for lead and copper and therefore cannot be sure of the quality of your drinking water during that time.*

### What Should I Do?

There is nothing you need to do at this time. You do not need to boil your water or take other corrective action.

This notice is to inform you that the MIBA BEARINGS LLC PWS did not monitor and report the required number of results for lead and copper parameters in the public drinking water system during the 2008 - 2010 time period, as required by the Ohio Environmental Protection Agency.

### What is being done?

Upon being notified of this violation, the water supply is required to have the drinking water analyzed again for lead and copper in 2011. The water supplier will take steps to ensure that adequate monitoring will be performed in the future.
