SUBJECT: FAILURE TO SUBMIT A CORROSION CONTROL RECOMMENDATION

Dear Ms. Curtis:

In accordance with Ohio Administrative Code (OAC) 3745-81-82(A), the Buckeye Landscape public water system is in violation for failure to submit corrosion control recommendations or a study proposing optimal corrosion control treatment. Recommendations are to include documentation addressing current water system conditions and support for the desired outcome of reducing lead levels below the action level. This was required to have been submitted by March 31, 2013. You were advised of this requirement in both an October 1, 2012 letter and in a January 7, 2013 e-mail (copies enclosed).

We are requesting your recommendations or study, be submitted within 14 days of the date of this letter. Recommendations must be provided in a completed 141-C Form. In the event you are unable to locate the form that was previously provided, one is enclosed for your convenience. Note under all circumstances corrosion control recommendations or a study is required. Also, in order to be able to credit Buckeye Landscape for the 5 lead and copper samples collected on February 13, 2013, a completed '5105 Form with appendix' must be completed and submitted to our office. If we can credit you for these, another set of 5 samples collected between July and December 2013 will be recommended. Go to <http://www.epa.state.oh.us/ddagw/reporting.aspx> for the 5105 Form and appendix.

If you have any questions, please contact me at carolyn.o'neal@epa.oh.gov or at (614) 728-3864.

Sincerely,

Carolyn O'Neal
