Re: Belmont County
Good Wood Inc. – Finishing Plant; Facility ID # 0607070221
Warning Letter

Dear Mr. Lewis:

The purpose of this letter is to notify your company of violations of the air permits issued for the Good Wood Inc. – Finishing Plant located at 208 Spring Street in Flushing, Ohio that were discovered during a recent review of the facility file, and to request correction of these violations. The air permit applicable to this facility is permit-to-install (PTI) #17-1553 issued on May 24, 1997, and modified on November 12, 1997. Applications for permits-to-operate (PTOs) for the emissions units at this facility are pending.

As we have discussed during several telephone conversations, the company has consistently failed to submit or timely submit the annual reports that are due by January 31 of each year for each of the four permitted emissions units at this facility (K001 – K004; spray booths #1 - 4). Annual reports for calendar years 2002-2004 were provided via facsimile on April 15, 2005. Even though you were contacted on July 7 and November 3, 2006, about the annual report for 2005, the report was never submitted. As was discussed during our July 14, 2008 call, the company has failed to provide the annual reports for the Finishing Plant for calendar years 2005-2007, and now has failed to provide the annual report for 2008, in violation of PTI #17-1553.

To resolve these reporting violations, please provide the required annual reports for calendar years 2005 - 2008 for this facility. As you indicated to me on July 14, 2008, spray booth #4 (emissions unit K004) was never installed, so this emission unit has been shut down in Ohio EPA's records and the PTO application was dead-ended. ***Please provide the overdue reports requested above within thirty (30) days of your receipt of this letter.***

In addition, please be advised that pursuant to Ohio Revised Code (ORC) § 3704.03(G), Ohio EPA cannot issue the operating permits for this facility unless there is a showing satisfactory to the director or the director's representative that the air contaminant sources are being operated in compliance with applicable emission standards and other rules. Therefore, Ohio EPA cannot renew your company's operating permits until you achieve compliance with the reporting requirements in the existing PTI for this facility.
