

Re: 2012 Annual Post-Closure Report  
Closed St. Marys Landfill  
Auglaize County  
Notice of Violation

May 15, 2013

Mr. Greg Foxhoven  
Director of Public Service and Safety  
City of St. Marys  
101 East Spring Street  
St. Marys, Ohio 45885

Dear Mr. Foxhoven:

The Ohio Environmental Protection Agency (Ohio EPA), Northwest District Office (NWDO) received the 2012 Annual Post-Closure Report (Report) for the City of St. Mary's Landfill (Facility) on March 29, 2013. The Report was reviewed by the Division of Materials and Waste Management (DMWM) and the Division of Drinking and Ground Water (DDAGW) to determine compliance with the regulations required by Ohio Administrative Code (OAC) Rule 3745-27-14(A)(6) and OAC Rule 3745-27-10(B)(5). Ohio EPA has reviewed the report and has the following comments:

### Violations

1. **The facility owner/operator, the City of Saint Marys, is in violation of Ohio Administrative Code (OAC) 3745-27-10 (B)(5)**, which requires an evaluation, including potentiometric surface maps for every geologic unit monitored, to determine if the requirements of OAC Rule 3745-27-10 (B) are still satisfied. The owner/operator has not provided potentiometric surface maps for all three significant zones of saturation (SZS). These maps, and evaluations, must be provided.

Based on cross sections provided by the owner/operator in April 2009, there are three (3) separate significant zones of saturation. (AW-3 and AW-4 are screened in a separate zone from the other SZS wells based on the most recent cross sections.) The owner/operator submitted one map for the "Significant Saturated Units", indicating flow direction; however, since there are three (3) significant zones of saturation, there needs to be a map and evaluation for each of these zones.

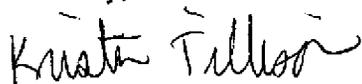

Mr. Greg Foxhoven

### Statements

2. Section I, Solid Waste Facility Name and Ohio Solid Waste Management District is blank. For future Report submittals ensure all areas are completed.
3. It appears that leachate data are for samples collected from the leachate collection system. The leachate collection system at this landfill only captures leachate from the vertical expansion and not from the entire landfill. The area under the vertical expansion is unlined.

If you have any questions related to groundwater, contact Randy Skrzyniecki at the Ohio EPA Northwest District Office (419) 373-3149. Any questions related to the remainder of this letter, please feel free to contact me at (419) 373-3064. Written correspondence should be sent to the attention of Kristin Tillison, Division of Materials and Waste Management, Ohio EPA Northwest District Office, 347 North Dunbridge Road, Bowling Green, Ohio 43402.

Sincerely,

Kristin Tillison, RS  
Environmental Specialist  
Division of Materials and Waste Management
