Re: **All City Auto Salvage, Inc.**
5/23/2013 Complaint Investigation
OHR000177014 Franklin County

Dear Mr. Baker:

Thanks for your time and assistance during my visit to your operations at 1547 Joyce Avenue on May 23rd. The purpose was to investigate a complaint (#4367) that Ohio EPA had received regarding waste automotive fluid disposal practices. Ohio's laws under Chapter 3745 of the Ohio Administrative Code and Chapter 3734 of the Ohio Revised Code establish a system for safe and responsible management of hazardous wastes and universal wastes.

Your business appears to be a Conditionally Exempt Small Quantity Generator of hazardous waste, with none in accumulation at the time of our visit. Used oil (transmission fluid, brake fluid) was being generated and accumulated, as well as used antifreeze for recycling. The following violations were noted:

1. **Used Oil Releases and Cleanup, OAC rule 3745-279-22(D):** Upon its detection, a release of used oil must be stopped, contained, cleaned up and the materials from the cleanup then must be properly managed.

Processed vehicles awaiting crushing, and a stack of old crushed and uncrushed gas tanks were leaking oil and other fluids onto the soil in an unpaved area between the pavement by the dismantling building and the crusher. The affected area of surface soils measured about 100 feet long by 45 feet wide. Soils were stained and puddles had oily layers and a discolored antifreeze color was also present from spilled commingled antifreeze. A vehicle processed that morning was still leaking fluids on the day of our visit from openings where some parts had been removed.

Take steps as necessary to stop ongoing releases from vehicles awaiting crushing. Plug any fluid draining openings with something to stop leaks from happening. Clean up the affected surface soils and properly evaluate them (as potential hazardous waste due to TCLP metals or organics) and manage them for disposal. Store items awaiting crushing, in an area where they will not leak fluids onto the ground. Additional site pavement between

the crusher and dismantling area is advised. Drip pans are also useful but may be problematic if rainfall causes them to overflow.

Ohio EPA requires timely actions for compliance with these rules. Please send me a response in 15 days, describing actions being taken to correct the violations noted above. If you have any other questions about my visit or this letter, do not hesitate to contact me by phone at (614) 728-3885.

Sincerely,
