RE: INEOS ABS (USA) Corporation, OH0009946;1IF00001*KD
NOTICE OF VIOLATION

Dear Mr. Cassisa:

This office has received the non-compliance notification for the above referenced facility. Our review indicates violations of the conditions of your NPDES permit. The specific instances of non-compliance and/or deficiencies are as follows:

On June 6, 2013, Mark Townsend called to notify the Division of Surface Water of a spill of approximately one gallon of oil to the Ohio River. The release was approximately 500 feet downstream of outfalls 1IF00001001 and 1IF00001002. The bulk of the oil was caught between the INEOS work barge and the river bank. The release appears to be from an oil sump on a crane associated with the barge facility. The source is still being investigated. Booms were deployed, and absorbent pads were used to soak up the oil floating on the river between the barge and river bank. Clean Harbors was called in to assist with the clean-up.

The release of the oil into the Ohio River is a violation of Ohio Administrative Code 3745-1-04(B) which states:

To every extent practical and possible as determined by the director, these waters shall be: Free from floating debris, oil, scum and other floating materials entering the waters as a result of human activity in amounts sufficient to be unsightly or cause degradation.

Please be advised that failure to comply with the effluent limitations, or to satisfy monitoring or reporting requirements of your NPDES permit may be cause for enforcement action pursuant to the Ohio Revised Code Chapter 6111. It should be noted this is the second release the facility has had in less than a month. The facility

should review and revise its storm water pollution prevention plan (SWP3) as well as spill procedures. These releases should not continue. In addition, the required five day reports and follow-up documentation on this release is still needed.

If you would have any questions regarding the above, please contact me at (937) 285-6108.

Sincerely,

Marianne Piekutowski
Environmental Specialist 2
Division of Surface Water
