Complaint #3256

Notice of Violation

July 15, 2013

Mr. Tom Wylie
Wylie & Sons Sand & Stone
27226 Glenwood Road
Perrysburg, Ohio 43551

Dear Mr. Wylie:

On July 9, 2013, the Ohio Environmental Protection Agency (Ohio EPA) conducted a complaint investigation at Wylie & Sons Sand & Stone (Wylie) located at 27226 Glenwood Road in Perrysburg, Ohio. The Ohio EPA received a complaint that there was black stained soil on the ground around a small above ground tank. This letter will explain the validity of the complaint and any hazardous waste violations found as a result of the complaint investigation.

During our complaint investigation, Wendy Miller and I spoke with Rich Wylie, and inspected your facility/property. Wylie is a trucking company which owns and services a fleet of semi-trucks. Used oil is generated from the truck service work that is done on-site. Used oil is stored in a 500-gallon tank located inside the maintenance building and burned in an on-site used oil burner. The outside above ground tank noted by the complainant was empty and no longer in use. Rich stated that this tank was used years ago to store used oil prior to the purchase of the used oil tank and burner. It was noted that there was crushed black asphalt on the ground in this area.

Used oil generators are required to: store used oil in containers which are in good condition and which are labeled with the words "used oil"; clean up any releases of used oil; transport used oil through registered used oil transporters; and recycle or dispose of the used oil properly. A copy of the following fact sheets, The Regulation of Used Oil: An Overview for Ohio Businesses Who Generate Used Oil, and Burning Used Oil in a Space Heater – For Businesses, are enclosed.

The used oil filters are hot-drained and managed as solid waste. As we discussed with Rich during our visit, Wylie may want to recycle the used oil filters as scrap metal once they have been properly drained. A list of used oil filter recyclers is enclosed.

We found the following violation of Ohio's hazardous waste laws:

1. OAC Rule 3745-279-22(C)(1): Labeling:

Containers, aboveground tanks, and fill pipes used for underground storage tanks shall be labeled or marked clearly with the words "Used Oil."

Mr. Tom Wylie

Page 2

Wylie had two 5-gallon buckets of used oil that were not properly labeled. In order to correct this violation, Wylie must properly label the two 5-gallon buckets with the words "Used Oil" and submit photographic documentation to demonstrate compliance.

Enclosed you will find a copy of the checklists that were completed during the complaint investigation.

The investigation performed by the Ohio EPA was conducted as a result of a complaint received by this Agency. A Comprehensive Compliance Evaluation Inspection was not conducted. The Ohio EPA did not find evidence to support the complainant's allegations; therefore, the Ohio EPA considers the complaint investigation closed.

Ohio EPA has helpful information about compliance assistance and pollution prevention at the following web address: <http://www.epa.ohio.gov/ocapp>. In addition, you can find copies of the hazardous waste rules and other information on the division's web page at: <http://www.epa.ohio.gov/dhwm/>.

Wylie needs to immediately take the necessary measures to return to compliance with Ohio's environmental laws. Within **14 days** of receipt of this letter, Wylie is requested to provide documentation to this office including the steps taken to abate the violations cited above.

Documentation of steps taken to return to compliance includes written correspondence, updated policies, and photographs, as appropriate, and may be submitted via the postal service or electronically to melissa.boyers@epa.ohio.gov.

Should you have any questions or if I can be of assistance, please contact me at (419) 373-3066.

Sincerely,

Melissa L. Boyers

**USED OIL INSPECTION CHECKLIST
GENERATORS, COLLECTION CENTERS AND AGGREGATION POINTS**

NOTE: 1. A facility is subject to the federal SPCC regulations (40 CFR 112) if it is non-transportation related (e.g., fixed) and has an aggregate above ground storage capacity greater than 1,320 gallons or a total underground storage capacity greater than 42,000 gallons of oil (including used oil), and there is reasonable expectation of a discharge to navigable waters.

2. Inspectors can check BUSTR's web-site at https://www.comapps.ohio.gov/sfm/fire_apps/bust/bustr/PublicInquiry.asp to determine if a UST containing used oil is registered with BUSTR. Inspectors may call BUSTR at 614-752-7938 or a BUSTR site coordinator to report an unregistered UST or a UST that appears to not be in compliance with BUSTR regulations. A list of BUSTR coordinators by county are at: https://www.comapps.ohio.gov/sfm/fire_apps/bust/bustr/SearchByCounty.asp.
