Re: Crozier Body Shop
OHD986980514
Wood County
Hazardous Waste
Return to Compliance

August 8, 2013

Mr. Bob Ackerman, Owner
Crozier Body Shop
13146 Main Street
P. O. Box 312
Weston, Ohio 43569

Dear Mr. Ackerman:

Thank you for your July 31, 2013, response to Ohio EPA's June 27, 2013, Partial Return to Compliance letter. You submitted waste evaluation documentation for the spent paint booth filters. My review of the documentation submitted reveals that Crozier Body Shop (CBS) located at 13146 Main Street in Weston, Ohio, has demonstrated abatement of all the violations cited in the May 9, 2013, NOV-PRTC.

The following is a summary of the violations cited in the May 9, 2013, NOV-PRTC as a result of our April 30, 2013, inspection and your compliance with respect to each:

1. Waste Evaluation: OAC Rule 3745-52-11:

Any person who generates a waste must determine if that waste is a hazardous waste by using generator knowledge or by testing the waste.

- a) At the time of the inspection, CBS did not have waste evaluation documentation for the spent paint booth filters. CBS has historically disposed of this spent material as a non-hazardous/solid waste. CBS must immediately cease disposing of the waste paint booth filters as non-hazardous waste until a proper waste evaluation has been completed.

On July 31, 2013, CBS submitted a copy of the analytical results for the spent paint booth filters. The analytical results indicate that this waste stream is not a hazardous waste and you may continue to manage it as a solid waste. The Ohio EPA recommends that an updated waste evaluation be conducted on the spent paint booth filters when there is a change made in your painting process.

With this information, this portion of the violation (a) has been abated.

- b) In addition, CBS failed to have waste evaluation documentation or an established recycling plan in place for the fluorescent bulbs generated at the facility.

This violation was previously abated on June 10, 2013.

This violation has been completely abated.

Mr. Bob Ackerman

2. Labeling: OAC Rule 3745-279-22(C)(1):

Containers, aboveground tanks, and fill pipes used for underground storage tanks shall be labeled or marked clearly with the words "used oil."

CBS had one 5-gallon bucket of used oil that was not properly labeled.

This violation was previously abated on April 30, 2013.

3. Off-Site Shipment: OAC Rule 3745-279-24:

Generators shall ensure that their used oil is transported only by transporters who have obtained an EPA identification number.

CBS has been giving the used oil they generate to the Shamrock Gas Station located across the street from the body shop.

This violation was previously abated on June 10, 2013.

Ohio EPA has helpful information about compliance assistance and pollution prevention at the following web address: <http://www.epa.ohio.gov/ocapp>. In addition, you can find copies of the rules and other information on the division's web page at: <http://www.epa.ohio.gov/dhwm/>.

Should you have any questions or if I can be of assistance, please contact me at (419) 373-3066.

Sincerely,

Melissa L. Boyers
Division of Materials and Waste Management
