RE: AUTO-TAP, INC., OHD089892129, CUYAHOGA CNTY, LQG NOV-RTC

Dear Mr. Mittas:

On June 20, 2013, this writer, representing Ohio EPA, Division of Materials and Waste Management (DMWM), visited Auto-Tap, Inc. (Auto-Tap), located at 3317 West 140TH Street in Cleveland, Ohio to conduct a hazardous waste compliance evaluation inspection (CEI). You represented Auto-Tap. Subsequently, on June 26 and June 27, 2013, Auto-Tap submitted documentation concerning personnel training, container inspections, and universal waste lamp management.

The purpose of the inspection was to determine Auto-Tap's compliance with Ohio's hazardous waste laws as found in Chapter 3734 of the Ohio Revised Code (ORC) and Chapter 3745 of the Ohio Administrative Code (OAC). The inspection included a review of the facility's operations, as well as written documentation. Auto-Tap was inspected for the requirements of a large quantity generator (LQG) of hazardous waste.

Based on the inspection, Ohio EPA identified the following violations:

1. **Personnel Training, OAC rule 3745-65-16(C):** Facility personnel must complete training on hazardous waste management and emergency response procedures. Facility personnel must take part in an annual review of the training.

Auto-Tap failed to conduct annual hazardous waste training for all required personnel in calendar year 2011. Auto-Tap did conduct annual training in calendar years 2012 and 2013. Auto-Tap's June 26 response indicated that training will be provided on an annual basis. **This violation has been adequately addressed. No further response is requested.**

2. **Inspections of Containers, OAC rule 3745-66-74:** The owner or operator must inspect areas where hazardous waste containers are stored, at least weekly, looking for leaks and for deterioration caused by corrosion or other factors. The owner or operator must record the inspections in an inspection log or summary.

Auto-Tap failed to conduct inspections of hazardous waste containers during the month of March 2013. Auto-Tap did conduct container inspections in 2011, 2012 and 2013 (with the exception of March). Auto-Tap's June 26 response indicated that weekly container inspections will be conducted. **This violation has been adequately addressed. No further response is requested.**

3. **Labeling/marketing Standards for Small Quantity Handlers of Universal Waste, OAC rule 3745-273-14(E):** Universal waste lamps must be labeled/marked with one of the following phrases: "universal waste lamp(s)," or "waste lamp(s)" or "used lamp(s)."

Auto-Tap failed to label/mark one cardboard box of universal waste lamps with the words required by this rule. The universal waste lamps were being accumulated in the maintenance area. Auto-Tap's June 27 response included a photograph of the box labeled as "used florescent lamps." **This violation has been adequately addressed. No further response is requested.**

4. **OAC Rule 3745-273-15(C), Accumulation Time Limits - Standards For Small Quantity Handlers of Universal Waste:** (A) A small quantity handler of universal waste may accumulate universal waste for no longer than one year from the date the universal waste is generated, or received from another handler, unless the requirements of paragraph B of this rule are met. (B) A small quantity handler of universal waste may accumulate universal waste for longer than one year from the date the universal waste is generated, or received from another handler, if such activity is solely for the purpose of accumulation of such quantities of universal waste as necessary to facilitate proper recovery, treatment, or disposal. However, the handler bears the burden of proving that such activity is solely for the purpose of accumulation of such quantities of universal waste as necessary to facilitate proper recovery, treatment, or disposal. (C) A small quantity handler of universal waste who accumulates universal waste must be able to demonstrate the length of time that the universal waste has been accumulated from the date it becomes a waste or is received. The handler may make this demonstration through methods identified in OAC rule 3745-273-15(C).

Auto-Tap failed to track the length of time that the universal waste lamps were accumulated on-site. Auto-Tap's June 26 and June 27 responses identified how the accumulation time for universal waste lamps will be tracked. **This violation has been adequately addressed. No further response is requested.**

Ohio EPA offers the following comments:

1. During the inspection of the exterior, rear of the facility, an oil leak was observed at the trash compactor unit. Auto-Tap should repair the oil leak and maintain this area in order to prevent impacts to storm water.

NOTE: This LDR checklist does not include the requirements for generators that treat to meet LDR standards. If the generator treats, the inspector should use the stand-alone Generator LDR checklist instead of this checklist.

GENERAL REQUIREMENTS

1.	If LDRs do not apply, does the generator have a statement that lists how the HW was generated, why LDRs don't apply and where the HW went? [3745-270-07(A)(7)]	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input checked="" type="checkbox"/>
2.	Did the generator determine if the HW/soil must be treated to meet the LDR treatment standard prior to disposal? Generator knowledge or testing may be used. [3745-270-07(A)(1)] If not,	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/>

NOTE: This is done by determining if the HW/soil contains levels of constituents greater than the levels given in its LDR treatment standard in 3745-270-40. However, if a specific treatment method is given in 3745-270-40 for the HW, no determination is required [3745-270-07(A)(1)(b)]. If soil, generator can choose to have soil treated to LDR levels given in 3745-270-49 (alternative treatment levels for soils).
