RE: City of Springfield Long Term Control Plan (LTCP) Compliance Schedule / Notice of Violation.

Dear Mr. Weaver:

I am writing in follow-up to your July 30, 2013, letter concerning the Erie Express sanitary sewer project. This project is part of the city of Springfield's LTCP compliance schedule, which is contained in the city's National Pollutant Discharge Elimination System (NPDES) permit 1PE00007*OD. The compliance schedule requires the submittal of a Permit to Install (PTI) for the Erie Express sanitary sewer project by no later than August 1, 2013.

Failure to meet the August 1, 2013, PTI submittal date is in violation of the city of Springfield's NPDES schedule. It is our understanding that several unforeseen complications involving access and alignment have delayed the project. These delays have become significant enough that the remainder of the Erie Express schedule may be impacted. In order to eliminate the on-going schedule violations, an NPDES permit modification request (see attached) along with a revised Erie Express sanitary sewer schedule will need to be submitted to the Ohio Environmental Protection Agency (Ohio EPA), Southwest District Office. The NPDES modification request with revised schedule must be submitted by no later than September 30, 2013.

If you have any questions regarding the report, you may contact Joe Reynolds at (937) 285-6097.

Sincerely,

Joe Reynolds
