**Re: 2011 Hazardous Waste Biennial Report Requirement – Notice of Violation
MULTICOLOR NORTH AMERICA CORP, WESTLAKE - OHR000158337**

Dear EDWARD A LEDVINA:

During a recent review of customer data from Ohio Treatment, Storage, and Disposal Facilities (TSDFs) it was noticed that one or more shipments of hazardous waste were received from MULTICOLOR NORTH AMERICA CORP during the 2011 calendar year. The amounts reported, 24.36 tons, indicate that this site was a large quantity generator in 2011. Enclosed are printouts of the shipment information. Because I have not received a Hazardous Waste Biennial Report for 2011, MULTICOLOR NORTH AMERICA CORP may be in violation of current federal and state laws concerning the generation, transportation and treatment of hazardous waste.

A large quantity generator is defined as a site which generates in any single month 1000 kg (2200 lbs.) or more of non-acute hazardous waste or 1 kg (2.2 lbs.) or more of acutely hazardous waste. This includes wastes from one-time generation as well as wastes from ongoing production processes. Generating hazardous waste at or above this amount for one or more months means that a facility is required to file a Hazardous Waste Report for the generating year in question. OAC Rule 3745-52-41 requires a generator who ships any hazardous waste off-site to prepare and submit to the Ohio EPA a Hazardous Waste Biennial Report and to describe and certify efforts that were made to minimize hazardous wastes. These reports are due March 1 of each even numbered year and must contain information about the activities of the previous calendar year. Only small quantity generators (between 220 and 2200 lb/mo of non-acutely hazardous wastes) and conditionally exempt small quantity generators (less than 220 lb/mo of non-acutely hazardous wastes) do not have to file the Biennial Report requirement as described in OAC Rule 3745-52-44.

MULTICOLOR NORTH AMERICA CORP should have on file the manifest records necessary to complete this report. OAC Rule 3745-52-40 requires generators to keep a signed copy of each manifest for a period of at least three years from the date the waste was accepted by the initial transporter. Receiving facilities and transporters are under a similar requirement. If you need copies of the original manifest(s), contact them for assistance.
