**Re: Able Auto  
Non-Notifier  
Complaint Investigation – CEI  
Franklin County – Blendon Twp.  
Notice of Violation**

Dear Mr. Korotkin:

On November 25, 2008, Ohio EPA received an anonymous complaint alleging improper disposal of used oil into an on-site septic system, which was also alleged to be in disrepair, at the Able Auto facility located at 4660 Cleveland Avenue, Columbus, OH. On December 23, 2008 and January 7, 2009, Ohio EPA conducted a complaint investigation and/or compliance evaluation inspection at the Able Auto facility to determine Able Auto's compliance with Chapter 3734. of the Ohio Revised Code and Chapter 3745. of the Ohio Administrative Code (OAC). During the investigation, you represented Able Auto and Phil Farnlacher and I represented Ohio EPA. You were provided with various Ohio EPA documents detailing appropriate management and pollution prevention alternatives for used oil and used oil filters, spent fluorescent light bulbs, aerosol cans, lead-acid batteries, universal wastes, and electronic wastes.

Although the complaint allegations could not be confirmed at this time, as a result of the complaint investigation and compliance evaluation inspection, it has been determined that Able Auto is currently in violation of the following OAC rules:

- 1. OAC Rule 3745-279-22(C)(1), Used Oil Storage Requirement for Generators:** Containers and aboveground tanks used to store used oil at generator facilities must be labeled or marked clearly with the words "used oil."

Able Auto uses a metal container (~150 gallons) located outside on the northwest corner of the building for management of used oil. This container was not labeled with the words "used oil," as required. Any other containers used for intermediate management of used oil located inside the building must also be appropriately labeled with the words "used oil."

To achieve compliance with this rule, please immediately label all containers used for the management of used oil with the words "used oil."

Ted Strickland, Governor  
Lee Fisher, Lieutenant Governor  
Chris Korleski, Director

2. **OAC Rule 3745-51-04(B)(13), Exclusions:** Non-terne plated used oil filters that are not mixed with waste listed in rules 3745-51-30 to 3745-51-35 of the OAC are not considered hazardous waste if these oil filters have been gravity hot-drained using one (1) of the following methods:

- (a) Puncturing the filter anti-drain back valve or the filter dome end and hot-draining;
- (b) Hot-draining and crushing;
- (c) Dismantling and hot-draining; or
- (d) Any other equivalent hot-draining method which will remove used oil.

Although Able Auto was attempting to drain the used oil filters, one (1) of the above methods was not being utilized allowing all of the used oil to drain.

To achieve compliance with this rule, Able Auto must immediately begin to crush, puncture, or initiate some method equivalent to those listed above in conjunction with hot-draining to adequately remove all used oil from the filters. Able should also consider managing the drained used oil filters as a scrap metal.

Please provide confirmation in writing that the above violations have been adequately abated within thirty (30) days of receipt of this notice of violation letter. The confirmation letter should be sent to my attention at the letterhead address. Upon receipt of the confirmation letter, a return-to-compliance inspection will be completed by Ohio EPA.

### **Additional Concerns**

There are at least (two) floor drains within the facility building. These floor drains reportedly discharge to the outside but are not known to where (i.e., septic system, storm sewer). Mr. Larry Korecko, Ohio EPA, Division of Surface Water, Central District Office will be in contact with you regarding use of these floor drains.

Franklin County has reported that sanitary sewer lines are scheduled to be installed in the area of Able Auto within calendar year 2009. At the time of this installation, Able Auto will be required to hook into the sanitary sewer system.

You indicated that you were looking into the possible purchase of an oil filter/empty aerosol can crusher/puncturing devise. When properly drained/punctured these filters/empty aerosol cans could be managed as a scrap metal instead of thrown into your regular trash.

Within the documentation previously provided to you titled, "LEAD-ACID BATTERIES MUST BE RECYCLED," was also sign that is required to be posted at your facility, due to Able Auto's battery supply business. Please be sure you have posted this sign, as was discussed.

A copy of the checklists completed during the investigation/inspection has been included for your review. Also included, please find information regarding Class V injection wells. You may also find helpful information on the division's web site address <http://www.epa.state.oh.us/dhwm> or at the Office of Pollution Prevention's web site address <http://epa.state.oh.us/opp>. Should you have any questions or need additional information, I can be reached by telephone at 614-728-5037.

Mr. Oleg Korotkin  
Able Auto  
Page -3-

**NOTICE:** Ohio EPA's failure to list specific deficiencies or violations in this letter does not relieve Able Auto from having to comply with all applicable regulations.

Respectfully,

Randy Sheldon  
Environmental Specialist  
Division of Hazardous Waste Management  
Central District Office

## FIELD ACTIVITY REPORT – COMPLAINT INVESTIGATION

On November 25, 2008, Ohio EPA received an anonymous complaint in regards to improper management of used oil at the Able Auto facility located at 4660 Cleveland Avenue, Columbus, Ohio 43231, Franklin County. The complainant alleged that used oil was being dumped into an on-site septic system. It was alleged that there is no oil/water separator associated with the septic system and the system itself was in disrepair and not operating correctly. It was alleged that cars were being parked on the system and it was collapsing.

On December 23, 2008, Ohio EPA, DHWM, CDO went to the Able Auto facility to review the current operations. Mr. Oleg S. Korotkin was the manager-in-charge of the facility and the operations. It was found that Able Auto is an automobile mechanical repair business (no body work/painting). Used oil was found to be in various containers/pans located near the door at the north end of the building. None of these containers were labeled with the words "used oil." Outside of this door was the septic system and associated metal cover. There was oil-like staining around this cover, but it was also a low spot in the blacktop where liquids would tend to pool. A ~150 gallon tank located outside on the northeast corner of the building, very near the septic system, was reportedly used for management of used oils. This tank was not labeled with the words "used oil." Used oil filters were being drained, prior to disposal with the regular trash, but were not being punctured or crushed. Brake cleaner in aerosol cans is used. Oil drip pans are placed beneath the brakes when the cleaner is used. Only empty cans are placed into the trash as unusable cans are returned to the supplier. Lead acid batteries are supplied through Able.

It was reported that the septic system management company performs a "quick test" to check for oils or other foreign substances in the septic system prior to pumping and hauling the septic waste. Information regarding the septic system management company was reported to be filed away and not readily available. A single piece of documentation regarding the management of used oil was provided. This document was dated September 19, 2008 and was from Volunteer Oil Service, Murfreesboro, TN. It was reported that other documentation regarding the off-site shipments of used oil was also filed away and not readily available. It was reported that this documentation would be provided for review, but more time than available on this day was needed to get everything in order. Mr. Korotkin indicated that he would be happy to hook into the sanitary sewer, if one was available to the area. He said he was not sure where the sewer trunk ran. I told him I would check this out with DSW and get back to him.

I explained the used oil rules for which he was currently in violation and told him I would be back to the site with DSW. I also discussed with him hazardous waste management and universal waste rules. I told him I would complete a compliance evaluation inspection at the facility upon my return, but he would be getting a notice of violation letter in regards to his current used oil management practices. I told him to get his records together in regards to septic system clean outs, used oil shipments, and/or any hazardous waste related records. He indicated all would be ready for my return visit. I told him I would contact him prior to my return to be sure all was ready and available.

On December 30, 2008, I called Volunteer Oil Service (615-904-6802) to see what records they may have regarding business activities with Able Auto. I told Volunteer I saw an agreement/document on their letterhead, dated September 19, 2008, regarding management

of used oil. Volunteer said upon a quick look, they did not show any business transactions completed with Able Auto this calendar year. I asked if they had done business with Able Auto in any other years. I again gave Volunteer the name and address of Able Auto and was told a more in depth search would be completed for 2008 and back and Volunteer would then call me with any information they had.

On December 31, 2008, I met with Larry Korecko, DSW, CDO. I provided a map (attached) that had the sewer and water lines included for the area. Korecko indicated that this facility should be connected to the sewer lines that have been provided by Franklin County within the last few years. Korecko indicated he would be in contact with Franklin County officials that he believed would require that this facility be connected to the sanitary system. He said he would keep me informed of any actions taken by Franklin County.

On January 2, 2009, Megan of Volunteer Oil called and told me they had a service agreement with Able and had supplied them with a tote, but had not picked up any oil from them to date. On this same day Megan called me back to say she did find records of receipt of a single load from Able and faxed me the document. She also said they did not supply a tote to Able and that the tank from which the used oil was collected was located outside at the rear of the facility.

On January 6, 2009, I spoke to L. Korecko and Franklin County sanitary sewer personnel and was informed that the sewers were scheduled to be put into this area during 2009. Franklin County inspects the on-site septic system at least one time per year and has informed Able management not to park cars on the system. It was indicated that when the sewer lines are installed, Able will be required to hook into the system.

On January 7, 2009, Phil Farnlacher, DSIWM, CDO and I returned to Able and met with Mr. Oleg Korotkin. The inside of the building was very orderly when compared to my initial visit. There were two (2) parts washers, a solvent spray machine which was not in use and an aqueous machine which was reportedly used sparingly. There were two (2) floor drains which could now be viewed. The aqueous parts washer and floor drains discharge to the outside, assumed to be into the septic system, but not known for sure. I presented Mr. Korotkin with information regarding the appropriate management of spent fluorescent light bulbs, used oil and oil filters, used lead-acid batteries, aerosol cans, universal wastes, and old electronic equipment. We discussed that he got new lead-acid batteries from his supplier, which also took back the used batteries for recycling. We then discussed that he had to put up a sign I provided to him, as required by the new statutory law. I told him he would be receiving a notice of violation that would detail what had to be completed to return to compliance. I also told him that Franklin County and/or Larry Korecko would be in contact with him in regards to the septic/sewer system and the floor drains. Mr. Korotkin indicated he was going to buy a filter/aerosol can crusher/puncture device.

**USED OIL INSPECTION CHECKLIST  
GENERATORS, COLLECTION CENTERS AND AGGREGATION POINTS**

*NOTE: A facility is subject to the federal SPCC regulations (40 CFR 112) if it is non-transportation related (e.g., fixed) and has an aggregate above ground storage capacity greater than 1,320 gallons or a total underground storage capacity greater than 42,000 gallons of oil (including used oil), and there is reasonable expectation of a discharge to navigable waters.*

**PROHIBITIONS**

1.	Does the generator manage used oil in a surface impoundment or waste pile? If yes:	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> N/A <input type="checkbox"/>
a.	Is the surface impoundment or waste pile regulated as a hazardous waste management unit? [3745-279-12(A)]	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input checked="" type="checkbox"/>

*NOTE: For example, used oil contaminated scrap metal stored in a pile.*

2.	Is used oil used as a dust suppressant? [3745-279-12(B)]	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> N/A <input type="checkbox"/>
3.	Is off-specification used oil fuel burned for energy recovery in devices specified in 3745-279-12(C)?	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input checked="" type="checkbox"/>

*NOTE: Multiple used oil checklists may be applicable if used oil handler is performing multiple tasks (e.g., if generating used oil and shipping directly to a burner, complete generator and marketer checklists at a minimum).*

**GENERATOR STANDARDS**

4.	Does the generator mix hazardous waste with used oil? If so,	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/>
a.	Is the mixture managed as specified in 3745-279-10(B)? [3745-279-21(A)]	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/>

*NOTE: Used Oil mixed with listed (3745-51-30 to 3745-51-35) or characteristic (3745-51-20 to 3745-51-24) hazardous waste are subject to regulation as a hazardous waste, unless the listed hazardous waste is listed solely because it exhibits a hazardous characteristic, and the resultant mixtures do not exhibit a characteristic. Mixtures of used oil and CESQG hazardous waste are subject to OAC Chapter 3745-279.*

5.	Does the generator of a used oil containing greater than 1,000 ppm total halogens manage the used oil as a hazardous waste unless the presumption is rebutted successfully? [3745-279-21(B)]	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input checked="" type="checkbox"/>
----	--	--

*NOTE: If used oil contains greater than 1000 ppm total halogens, it is presumed to be listed hazardous waste until the presumption is successfully rebutted.*

6.	Does the generator store used oil in tanks; or containers; or a unit(s) subject to regulation as a hazardous waste management unit? [3745-279-22(A)]	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/>
7.	Are containers and aboveground tanks used to store used oil in good condition with no visible leaks? [3745-279-22(B)]	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/>
8.	Are containers, above ground tanks, and fill pipes used for underground tanks clearly labeled or marked "Used Oil"? [3745-279-22(C)]	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> N/A <input type="checkbox"/>
9.	Has the generator, upon detection of a release of used oil, done the following: [3745-279-22(D)]	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/>
a.	Stopped the release?	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/>
b.	Contained the release?	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/>
c.	Cleaned up and properly managed the used oil and other materials?	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/>
d.	Repaired or replaced the containers or tanks prior to returning them to service, if necessary?	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/>

**ON-SITE BURNING IN SPACE HEATER**

10.	Does the generator burn used oil in used-oil fired space heaters? [3745-279-23] If so:	
a.	Does the heater burn only used oil that owner/operator generates or used oil received from household do-it-yourself (DIY) used oil generators?	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input checked="" type="checkbox"/>

b.	Is the heater designed to have a maximum capacity of not more than 0.5 million BTU per hour?	Yes <input type="checkbox"/>	No <input type="checkbox"/>	N/A <input checked="" type="checkbox"/>
c.	Are the combustion gases from heater vented to the ambient air?	Yes <input type="checkbox"/>	No <input type="checkbox"/>	N/A <input checked="" type="checkbox"/>

*NOTE: Ash accumulated in a space heater must be managed in accordance with 3745-279-10(E).*

**GENERATOR TRANSPORTATION**

11.	Does the generator have the used oil hauled only by transporters that have obtained a U.S. EPA ID#?	Yes <input checked="" type="checkbox"/>	No <input type="checkbox"/>	N/A <input type="checkbox"/>
12.	If the generator self-transported used oil to an approved collection site or to an aggregation point owned by the generator: [3745-279-24]			
a.	Does the generator transport used oil in a vehicle owned by the generator or an employee of the generator?[3745-279-24]	Yes <input type="checkbox"/>	No <input type="checkbox"/>	N/A <input checked="" type="checkbox"/>
b.	Does the generator transport more than 55 gallons of used oil at any time?[3745-279-24]	Yes <input type="checkbox"/>	No <input type="checkbox"/>	N/A <input checked="" type="checkbox"/>

*NOTE: Used oil generators may arrange for used oil to be transported by a transporter without a U.S. EPA ID # if the used oil is reclaimed under a contractual agreement (i.e., tolling arrangement).*

**COLLECTION CENTERS AND AGGREGATION POINTS**

13.	Is the DIY used oil collection center in compliance with the generator standards in 3745-279-20 to 3745-279-24? [3745-279-30]	Yes <input type="checkbox"/>	No <input type="checkbox"/>	N/A <input checked="" type="checkbox"/>
14.	Is the non-DIY used oil collection center registered with Ohio EPA? [3745-279-31]	Yes <input type="checkbox"/>	No <input type="checkbox"/>	N/A <input checked="" type="checkbox"/>
15.	Is the used oil aggregation point in compliance with the generator standards in 3745-279-20 to 3745-279-24? [3745-279-32]	Yes <input type="checkbox"/>	No <input type="checkbox"/>	N/A <input checked="" type="checkbox"/>

*NOTE: Complete Used Oil Generator and any other applicable used oil handler checklist (e.g., marketer, burner, etc.) for used oil collection centers and aggregation points.*

**CONDITIONALLY EXEMPT SMALL QUANTITY GENERATOR REQUIREMENTS  
COMPLETE AND ATTACH A PROCESS, WASTE, P2 SUMMARY SHEET**

CESQG: ≤ 100Kg. (Approximately 25-30 gallons) of waste in a calendar month or < 1 Kg. of acutely hazardous waste.  
 SQG: Between 100 and 1,000 Kg. (About 25 to under 300 gallons) of waste in a calendar month.  
 LQG: ≥1,000 Kg. (~300 gallons) of waste in a calendar month or ≥1 Kg. of acutely hazardous waste in a calendar month.

NOTE: To convert from gallons to pounds: Amount in gallons x Specific Gravity x 8.345 = Amounts in pounds.

Safety Equipment Used:

**WASTE EVALUATION**

1.	Have all wastes generated at the facility been adequately evaluated? [3745-52-11]	Yes <input checked="" type="checkbox"/>	No <input type="checkbox"/>	N/A <input type="checkbox"/>
----	--	---	-----------------------------	------------------------------

**GENERATOR CLASSIFICATION**

2.	Does the generator produce <100 kg. of hazardous waste per month? [conditionally exempt small quantity generator ("CESQG")]	Yes <input checked="" type="checkbox"/>	No <input type="checkbox"/>	N/A <input type="checkbox"/>
----	--	---	-----------------------------	------------------------------

NOTE: If quantities of hazardous waste accumulated on-site at any one time exceed 1,000 Kg. - or the generator produces between 100 and 1,000 Kg. of hazardous waste per month, it is operating as a Small Quantity Generator ("SQG"). If so, complete the Small Quantity Generator Requirements checklist.

**OFF-SITE SHIPMENT OF HAZARDOUS WASTE**

3.	Does the CESQG ensure delivery of hazardous waste(s) to an off-site permitted TSD? [3734.02(F)]	Yes <input checked="" type="checkbox"/>	No <input type="checkbox"/>	N/A <input type="checkbox"/>
	Hazardous brake cleaner is managed with used oil.			

**TREATMENT OF HAZARDOUS WASTE**

4.	Does the generator treat hazardous waste in a:			
a.	Container that meets 3745-66-70 to 3745-66-77?	Yes <input type="checkbox"/>	No <input type="checkbox"/>	N/A <input checked="" type="checkbox"/>
b.	Tank that meets 3745-66-90 to 3745-66-101 except 3745-66-97(C)?	Yes <input type="checkbox"/>	No <input type="checkbox"/>	N/A <input checked="" type="checkbox"/>
c.	Drip pads that meet 3745-69-40 to 3745-69-45?	Yes <input type="checkbox"/>	No <input type="checkbox"/>	N/A <input checked="" type="checkbox"/>
d.	Containment building that meets 3745-256-100 to 3745-256-102?	Yes <input type="checkbox"/>	No <input type="checkbox"/>	N/A <input checked="" type="checkbox"/>

NOTE: Complete appropriate checklist for each unit.

NOTE: If the CESQG conducts treatment they are subject to the LQG requirements.

NOTE: If waste is treated to meet LDRs, use LDR checklist.

Re: **Ace Iron and Metal  
Used Oil Generator  
OHR000118802  
Franklin County, CDO  
RTC**

Dear Mr. Shank:

Thank you for your March 28, 2008, response to Ohio EPA's February 21, 2008, Notice of Violation letter. The documentation you submitted included photographs of your clean and correctly labeled used oil storage areas. My review of this documentation reveals that Ace Iron & Metal has now abated all violations discovered during the February 14, 2008 inspection as listed below.

Letter Citation #	Rule Citation
1.	OAC Rule 3745-279-22 (C), Used Oil Generator Standards
2.	OAC Rule 3745-279-22(D), Used Oil Generator Standards

If you should have any questions, please feel free to contact me at (614)728-3884.

Sincerely,

Peter Maneff  
Environmental Specialist  
Division of Hazardous Waste Management
