**Re: Accurate Manufacturing
CESQG
OHD987022258
Franklin County**

Dear Ms. Merrill:

Thank you for accompanying me during Ohio EPA's December 28, 2007, inspection of the Accurate Manufacturing facility in Columbus, Ohio. We inspected Accurate Manufacturing to determine its compliance with Ohio's hazardous and Universal waste laws as found in Chapter 3734 of the Ohio Revised Code (ORC) and Chapter 3745 of the Ohio Administrative Code (OAC). This letter will explain the violations we found, what you need to do to correct the violations, other general concerns we have and what you need to do to respond to our general concerns.

We found the following violations of Ohio's hazardous waste laws:

1. **Used Oil Generator Standards (OAC 3745-279-22 (C))**
Containers and aboveground tanks used to store used oil at generator facilities shall be labeled or marked clearly with the words "Used Oil." At the time of the inspection the used oil containers were not labeled with the words "Used Oil."

Accurate Manufacturing needs to label the used oil drums, totes, and containers and submit a photo to me.
2. **Used Oil Generator Standards [OAC 3745-279-22(D)]**
The Generator upon detection of a release of used oil must clean up and properly manage the used oil and other materials. The ground around the used oil drums were stained with oil.

Ted Strickland, Governor
Lee Fisher, Lieutenant Governor
Chris Korleski, Director

Ms. Angela Merrill
Vice President
Accurate Manufacturing
Page -2-

Oil spill-affected area(s) must be cleaned up promptly. Remove all visibly stained soils and manage them properly. They may be treated at a special facility or disposed as solid waste.

Accurate Manufacturing must submit photos to me showing final cleanup around the used oil storage area.

Enclosed please find copies of the checklists completed, and some pollution prevention information on fluorescent lamps. Should you have any further questions, please feel free to contact me at (614) 728-3884.

You can find copies of the rules and other information on the division's web page at <http://www.epa.state.oh.us/dhwm>. Ohio EPA also has helpful information about pollution prevention at the following web address: <http://www.epa.state.oh.us/opp/oppmain.html>

Mr. Jeremy Hamilton
Advance Machining & Gear
2375 Harrisburg Pike
Grove City, OH 43123

Dear Mr. Hamilton:

On April 3, 2007, I conducted a compliance evaluation inspection of Advance Machining & Gear (Advance) in Grove City, Ohio to determine Advance's compliance with Ohio's hazardous waste and used oil laws and regulations as found in Chapter 3734 of the Ohio Revised Code (ORC) and Chapter 3745 of the Ohio Administrative Code (OAC). This letter will explain the violation I found, other general concerns I have and what you need to do to respond to my general concerns.

I found the following violation of Ohio's hazardous waste laws.

- OAC 3745-279-22(C), Used Oil Generator Standards**
Containers and aboveground tanks used to store used oil at generator facilities shall be labeled or marked clearly with the words "Used Oil."

Advance Machining & Gear had labeled the used oil tote with the words "waste oil." On April 5, 2007, Advance emailed a photo of the properly labeled used oil tote. The violation was abated at that time.

Enclosed you will find a completed checklist. I have also enclosed some information on fluorescent bulbs along with a list of fluorescent bulb recyclers. Thank you for your time during this inspection. Please feel free to call me at (614) 728-3882 if you have any questions or need additional assistance.

If there are more than 7 waste codes and they are the same as listed in the most recent RCRAInfo source record, you do not need to list them all. Instead just indicate the date of the most recent source record.

Dear Mr. Raleigh:

**Re: Air Tahoma (complaint investigation)
Non-notifier, Franklin County**

Dear Mr. Raleigh:

Thank you for your response letter (received June 19, 2008) to Ohio EPA's May 8, 2008 Notice of Violation letter. You provided evidence of Air Tahoma's corrections related to:

- 1.) **Hazardous Waste Evaluation, OAC rule 3745-52-11:** The waste materials in barrels, and the wastes from paint stripping operations, have been evaluated and containers were marked as to their contents. Alodine wastes will be evaluated and properly managed if and when they may be generated in the future, you indicated.
- 2.) **Used Oil Container and Tank Marking, OAC rule 3745-279-22(C):** The 55-gallon drums of used oil have now been properly marked.

The two violations discovered at Air Tahoma's facility at Rickenbacker Airport Building 597 during my April 10, 2008 inspection have both now been abated.

Other measures taken by the owner of the vintage aircraft parked outside the facility to control oil leakage threatening storm water, have also been noted and are adequate to address that concern.

The used solvent that you have accumulated on site may be a hazardous waste. At the time of my inspection visit, Air Tahoma was operating as a *Conditionally Exempt Small Quantity Generator* of hazardous waste. An optional EPA hazardous waste generator identification number may be obtained if needed to facilitate shipping your hazardous waste for proper recycling/disposal (a form and instructions are available online at <http://www.epa.state.oh.us/dhwm/notiform.html>).
