**Franklin County**

Dear Mr. Crawford:

Thank you for accompanying me during Ohio EPA's March 23, 2010, complaint investigation of Buckeye Tire's facility in Columbus, Ohio. Due to allegations of illegal dumping of used oil we investigated Buckeye Tire to determine its compliance with Ohio's hazardous waste laws as found in Chapter 3734 of the Ohio Revised Code (ORC) and Chapter 3745 of the Ohio Administrative Code (OAC).

We found the following violations of Ohio's hazardous waste laws.

- **Used Oil Generator Standards [OAC 3745-279-22(D)]**

The generator upon detection of a release of used oil must clean up and properly manage the used oil and other materials. The ground in and around the equipment building was saturated with used oil.

Oil spill-affected area(s) must be cleaned up promptly. Remove all visibly stained soils and manage them properly. They may be treated at a special facility or disposed as solid waste.

Buckeye Tire must submit photos to me showing final cleanup.

If you would like a free, non-regulatory on-site pollution prevention assessment or if you would like more information about pollution prevention, please contact me at (614)728-3884. Ohio EPA has helpful information about this at the following web address:

Mixtures of used oil and CESQG hazardous waste are subject to OAC Chapter 3745-279.*

5.	Does the generator of a used oil containing greater than 1,000 ppm total halogens manage the used oil as a hazardous waste unless the presumption is rebutted successfully? [3745-279-21(B)]	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input checked="" type="checkbox"/>
----	--	--

*NOTE: If used oil contains greater than 1000 ppm total halogens, it is presumed to be listed hazardous waste until the presumption is successfully rebutted.*

6.	Does the generator store used oil in tanks; or containers; or a unit(s) subject to regulation as a hazardous waste management unit? [3745-279-22(A)]	Yes <input type="checkbox"/> No <input type="checkbox"/> N/A <input type="checkbox"/>
