Re: **Columbus City Southerly
Wastewater Treatment Plant

NOV**

Dear Mr. Posekany:

Paul Zeier, Chief Chemist accompanied me on October 23, 2008, during Ohio EPA's inspection of City of Columbus Southerly Wastewater Treatment Plant [Southerly] at 6977 South High Street, Lockbourne, Ohio. Southerly Wastewater Treatment Plant treats City of Columbus waste water and is a secondary, activated sludge plant. I inspected Southerly to determine its compliance with Ohio's hazardous waste laws as found in Chapter 3734. of the Ohio Revised Code (ORC) and Chapter 3745. of the Ohio Administrative Code (OAC). Our inspection included an inspection of site operations and a review of written documentation.

I found the following violation of Ohio's universal waste laws:

1. **OAC Rule 3745-273-14(E), Universal Waste Lamps:** A small quantity handler of universal waste lamps must label or mark the universal waste lamps or a container or package with the words "Universal Waste-Lamp(s)," or "Waste Lamp(s)," or "Used Lamps."

Southerly failed to label or mark the lamps which were being managed as universal waste lamps with the words "Universal Waste-Lamp(s)," or "Waste Lamp(s)," or "Used Lamps."

Southerly properly labeled a package of the universal waste lamps during the inspection.

General Comment

During the inspection we were unable to access the area where universal waste batteries are accumulated, because the building was locked. Please provide a picture of the universal waste batteries to demonstrate that these batteries are properly labeled.

Enclosed you will find a copy of the checklists completed as a result of the inspection. Should you have any questions, please feel free to contact me at 614.728.3882 or at andy.kubalak@epa.state.oh.us.

Sincerely,

Andy Kubalak

Process Description:

Southerly treats City of Columbus waste water, and is a secondary activated sludge plant.

Site Activity/Waste Management:

Southerly was not generating any hazardous waste at the time of the inspection.

Five parts cleaning tanks are used throughout the plant. Three are located at the service building, and one each at the centrifuge thickening and the centrifuge dewatering operations. These five parts cleaning tanks generate spent solvent which is currently picked up under contract with Safety-Kleen and managed under the continued use program.

A painting booth used previously at the site is no longer in use. Water based paints are used for site maintenance. Paint waste has been evaluated to be non-hazardous waste.

Used oil generated from plant equipment is stored on site in 55 gallon drums, and in smaller containers. Central Ohio Oil [Heartland] periodically pumps the used oil. Spill control equipment is available at the used oil storage area if needed. The containers of used oil were properly labeled at the time of the inspection. I explained the difference between used oil and waste oil. I explained the proper management of used oil/spill clean up material.

Electronics out of service are managed under a City of Columbus citywide contract.

Batteries and lamps are both stored at the site and are both managed as universal waste. Southerly was in the process of moving the universal lamp waste storage area during the inspection.
