Re: Class V Injection Wells – Contracting Wood Services & JTS Contractors

Dear Mr. Kellems:

This letter serves as a follow up to the correspondence between Ohio EPA and your office regarding the existence of Class V Injection Wells at JTS Contracting and Contracting Wood Services. Based on the information you provided, unauthorized Class V wells exist at the aforementioned properties.

The October 19, 2007 letter from Ohio EPA explains that in accordance with Ohio Law, (OAC 3745-34-13(A)) disposal of industrial waste fluids into a Class V injection well is prohibited without first applying for and obtaining a Class V Industrial Well Permit to Operate. With a letter dated November 19, 2007, you had indicated that the floor drains for these two businesses would be plugged by 1/2/08 until they can be connected to a sanitary sewer.

Once these drains are plugged, please advise Ohio EPA through a Closure Report. In the meantime, no injection is authorized. Should you choose to apply for a Class V Industrial Waste Permit to Operate, a permit application will be provided upon request.

Should you have any questions, please call me at (614) 644-2752.

Sincerely,

Jess Stottsberry
