Re: High Bridge Glens Class V Remediation Project – **Notice of Violation**

Dear Mr. Weinstein:

Ohio EPA has completed its review of the February 2nd, 2010 submittal providing Ohio EPA with the total volume injected from October 6, 2009 through January 29, 2010. Pursuant to Ohio Administrative Code Rule 3745-34-11(G)(3), the injection of fluids into a class V well for purposes of remediating ground water or soil contamination is authorized without a permit if the owner submits to the director all the following information **monthly** while fluids are being injected:

- (a) A description of the fluids injected into the class V well;
- (b) **The volume of fluid injected into the class V well;**
- (c) **The rate of injection of fluid into the class V well; and**
- (d) Any monitoring results.

SRW Environmental is being cited in violation of the aforementioned rule as it failed to provide "monthly" operating reports, failed to provide volumes injected into each well, and failed to provide the injection rates.

Any future violations may require SRW to obtain a Class V permit to operate should it intend to continue injection activities.

Ted Strickland, Governor
Lee Fisher, Lieutenant Governor
Chris Korleski, Director
