Re: Class V Motor Vehicle Waste Disposal Well

To whom it concerns:

Based on a visual inspection during a site visit on May 31, 2007, your facility is operating a Class V Motor Vehicle Waste Disposal (MVWD) well which is defined as a well that receives or has the potential to receive fluid(s) from vehicular repair or maintenance activities. Class V MVWD wells include, but are not limited to, floor drains or shop sinks which connect to a septic system, dry well, or leach field.

As of January 1, 2005, Ohio Administrative Code (OAC) Rule 3745-34-13(A) prohibits the discharge of vehicle fluids or wash waters through floor drains or shop sinks into the ground via a septic system, leach field or dry well.

In accordance with the OAC Rule 3745-34-13, you must cease discharging all MVWD related fluids and permanently plug and abandon the well. You may wish to install a holding tank for these fluids, connect to a sanitary sewer if available, or simply cement all of the connections to the Class V well. You must submit within thirty (30) days, a plan for permanently plugging and abandoning the well as required by OAC Rule 3745-34-13(F). Upon completion of the well closure, the owner or operator of any MVWD well must certify in a report to the Director according to OAC Rule 3745-34-17 that the well was closed in compliance with this rule.

Should you have any questions concerning the requirements of this notice, please contact Valerie Orr or Jess Stottsberry of my staff at (614) 644-2752.

Sincerely,

Lindsay C. Taliaferro III
UIC Unit Manager
Division of Drinking and Ground Waters
