**Re: Conduit Pipe Products / Madison County  
Industrial Storm Water Permit 4GR00292\*DG**

Dear Mr. Costello:

This letter is written in regard to an industrial storm water inspection that I conducted at Conduit Pipe Products, on November 14, 2011, at your facility located in West Jefferson, Ohio. The inspection was conducted in order to determine compliance with your industrial storm water general permit. Your facility manufactures pipe products. The following items were noted during the inspection:

There are two swales around your property that discharge from your property at a single location located in the northeast corner of your property.

There were empty drums stored without lids in the rear of the property. It is recommended that empty drums are stored upright with lids. Please see attached pictures.

There were two uncovered dumpsters stored in the rear of the property. The dumpsters did not appear to be completely under roof and appeared to be leaking. It is recommended that the dumpsters be stored completely under roof or be covered. Please see attached pictures.

If you have any questions regarding this letter or my inspection, please do not hesitate to contact me at our Central District Office at 614-728-3851.

Sincerely,

Gregory L. Sanders  
Environmental Specialist  
Division of Surface Water  
Central District Office
