Mr. Austin Walter, Plant Manager
New Eezy Gro, Inc (Golden Eagle Products)
5123 State Route 103 West
Sycamore, Ohio 44882

Dear Mr. Walter:

This will acknowledge our January 26, 2012, compliance inspection at your Sycamore facility. This facility is located at 5123 State Route 103 West, Sycamore, Ohio. The inspection included a brief tour of the facility's storm water discharge associated with industrial activities. This inspection was conducted to evaluate compliance with your National Pollutant Discharge Elimination System (NPDES) permit No. 2II00109*AD.

Waste water is generated primarily from equipment cleaning and is collected to be reused in the fertilizer blending process. No oil sheen was observed in the storm water pond. At the time of the inspection, the pond was discharging a clear effluent to Taylor Run, a tributary of the Sandusky River.

We recommend that you continue to review and implement proper material handling methods at your facility so as to prevent any of the materials from coming into contact with the storm water. A small amount of spilled lime west of your complex must be cleaned up immediately.

Our review of your Discharge Monitoring Reports (7/1/2010 to 12/31/2011) indicated a few effluent violations. Please refer to the enclosed violation table. If you have any questions or comments, please call me at 419-373-3021.

Sincerely,

Jason Ko
Division of Surface Water
