Re: Winchester Bend, Franklin County

Dear Mr. Fulkert:

This letter is written regarding the storm water inspection that I conducted on March 12, 2012, at Winchester Bend located near the intersection of Winchester Pike and Hamilton Road, in Columbus, Ohio. I understand that these construction activities are currently covered under the General Storm Water Permit Associated with Construction Activities. Based on my site inspection and the General Storm Water Permit, the following items must be addressed.

Sediment and Erosion Controls:

1. Perimeter silt fencing was installed and appeared to be maintained, except for a few small sections. There were a few sections of silt fence that needed to be repaired. Please maintain and repair silt fence.
2. Dandy bags were installed and maintained on most storm water drains. There were a few storm water drains that needed to have dandy bag covers.
3. Please be aware the General Permit mandates specific permanent and temporary stabilization requirements. All disturbed areas which remain idle in excess of 21 days must be protected from erosion within seven days of the last earth disturbing activities. All areas of final grade must be protected within seven days. Most barren areas were at or near final grade and needed to be stabilized. Please stabilize all barren areas at final grade.
4. A riser with filter fabric was installed on the sediment pond effluent structure.

If you have any questions regarding this letter or my inspection, please do not hesitate to call me at our Central District Office at (614) 728-3851.

Sincerely,

Gregory L. Sanders
