**Re: Construction Storm Water Inspection at Westerville Health Center**  
**Date: February 16, 2012, Permit Number: 4GC033455\*AG**

Dear Terry:

This letter is written regarding the storm water inspection I conducted of the construction activities associated with Westerville Health Center, located near Westerville, Ohio on February 16, 2012. The Agency understands these construction activities are currently covered under the General Storm Water Permit Associated with Construction Activities. Based on the site inspection and the General Storm Water Permit, the following items must be addressed:

**Sediment and Erosion Controls:**

1. All barren areas which are idle in excess of 21 days must be protected from erosion to ensure compliance with your General Permit. Given the time of year a straw mulch cover or equivalent is expected within seven days for all eligible areas. The areas which appear to require stabilization are clearly depicted in the attached photos.
2. All perimeter controls must be maintained via your required self-inspections every seven days or within a precipitation event equal to or greater than 0.5 inches. A log of all inspection must be made available for review upon request.

If you have any questions regarding this letter or the inspection, please do not hesitate to call me at our Central District Office at (614) 728-3844 or email at [harry.kallipolitis@epa.state.oh.us](mailto:harry.kallipolitis@epa.state.oh.us). In addition, please provide a written response (**email preferred**) to the action items addressed above within ten days from receipt of this letter. A follow up inspection will be conducted to ensure the minimum conditions of the General Permit have been met.

Sincerely,

Harry Kallipolitis  
Storm Water Coordinator  
Division of Surface Water  
Central District Office

HK/nsm Westerville Health Center 2-16-2012
