**Re: Gender Road, Ph. 2, Franklin County  
General Storm Water Permit #4GC03747\*AG**

Dear Mr. Sims:

This letter is written regarding a storm water inspection that I conducted on June 5, 2012, at the Gender Road, Ph. 2 project located along Gender Road from US 33 to Winchester Highlands Drive, in Canal Winchester, Ohio. The Agency understands that these construction activities are currently covered under the General Storm Water Permit Associated with Construction Activities. Based on the site inspection and the General Storm Water Permit, the following was observed or discussed at the site:

**Sediment and Erosion Controls:**

- Please be aware the General Permit mandates specific permanent and temporary stabilization requirements. All disturbed areas which remain idle in excess of 21 days must be protected from erosion within seven days of the last earth disturbing activities. All areas of final grade must be protected within seven days. All earth disturbing activities should be clearly logged in your inspection reports to ensure the 21 day / seven day requirement is not violated. It was noted that construction is on-going at the site.
- The General Permit requires the permittee to conduct inspections of all sediment and erosion controls every seven days or within 24 hours of a rain event equal to or greater than 0.5 inches. A log of the inspections and resulting corrective actions must be maintained on site available for review. All earth disturbing activities must be clearly documented in your inspection reports to ensure the temporary or permanent stabilization requirements are not violated.

If you have any questions regarding this letter or the inspection, please do not hesitate to contact me at our Central District Office at (614) 728-3851.

Sincerely,

Gregory L. Sanders  
Environmental Specialist  
Division of Surface Water  
Central District Office
