RE: WAYNE COUNTY  
CITY OF WOOSTER  
MUNICIPAL STORM WATER  
ANNUAL REPORT REVIEW – 2011

FACILITY PERMIT NO: 3GQ00130\*AG  
DATE OF INITIAL PERMIT COVERAGE: 6/5/2009  
DATE OF NPDES PERMIT RENEWAL: 6/5/2009

Joel Montgomery, P.E.  
City Engineer  
City of Wooster  
City Hall, Division of Engineering  
538 N. Market Street  
Wooster, OH 44691

Dear Mr. Montgomery:

On March 23, 2012, Ohio EPA received a copy of the annual report required by the Ohio EPA General Storm Water National Pollutant Discharge Elimination System (NPDES) permit for Small Municipal Separate Storm Sewer Systems (MS4s) #OHQ000002. Upon review, Ohio EPA has determined the following:

The annual report for reporting year 2011 is incomplete. In particular, the annual report does not provide the following information:

- The City of Wooster uses Wayne County SWCD and Wayne County Health District to conduct parts of the Public Education and Outreach and Public Involvement programs. The Memorandum of Understanding (MOU) between The City of Wooster and these third parties has not been provided. Please submit a current, signed copy of this (these) MOU(s) or contracts.
- An attachment that identifies the construction sites within your jurisdiction that are subject to storm water pollution prevention plan (SWP3) review and site inspection. Identify construction start and end dates, as appropriate, and the NPDES facility permit number of each construction activity listed. For subdivided development, please provide a list of individual lots within the development, either by address or subplot number, upon which construction occurred during this reporting period, e.g., individual home building lots within a residential subdivision. Provide an indication as to whether or not your program includes inspection of individual lot construction.

Finally, the annual report indicates the following possible areas of non-compliance with performance standards contained within the NPDES permit:

- **Dry Weather Screening of MS4 Outfalls** – The City of Wooster did not conduct any dry weather screening of MS4 outfalls during the reporting period. Please be aware that you must conduct dry weather screening of 100% of your outfalls by the end of the current NPDES permit term. If this activity has already been completed, you are to prioritize outfalls with indicators of potential illicit discharge and perform on-going, follow-up investigations to identify sources of illicit discharge and eliminate them.
- **Post-Construction BMP Verification** – During the reporting period, Ohio EPA received Notices of Termination for the following construction sites within your community:
  - College of Wooster, John P. Papp Stadium – 3GC04456\*AG
  - City of Wooster "Old WTP" – 3GC02442\*AG
  - PIR 062, Apple Creek Road – 3GC05073\*AG

Post-construction BMPs were required to be installed and a long-term maintenance agreement was to have been developed for post-construction BMPs at these sites. For each of these sites, please indicate the post-construction BMPs installed and indicate if you have conducted an inspection to verify their installation.

Please submit the items necessary to complete your annual report and, if violations or possible non-compliance are noted above, please provide me with a letter of response indicating the actions taken to correct these violations. For actions yet to be completed, provide me with a schedule by which corrective action will be complete. If we have incorrectly identified violations or areas of possible non-compliance, please provide a letter of explanation and documentation to support your position. Your response should be received no later than **June 27, 2012**.

If you have any questions, please contact me at (330) 963-1125 or via e-mail at [kelly.mcvay@epa.ohio.gov](mailto:kelly.mcvay@epa.ohio.gov).

Sincerely,

Kelly McVay  
Assistant to the District Engineer  
Division of Surface Water
