Re: **Notice of violation**
4GCO00070*AG

Dear John Hopfinger:

This letter is written regarding the storm water inspection conducted by Brittany Turner, Elizabeth Pleta, Alicia Rector, and Jacqueline Sexton of the Ohio EPA at the intersection of Greif parkway and US route 23 on June 20, 2012. The Agency understands these construction activities are currently covered under the General Storm Water Permit Associated with Construction Activities. Based on the site inspection and the General Storm Water Permit, the following items must be addressed:

Sediment and Erosion Controls:

- The silt fence around the perimeter of the site has failed to be properly maintained, resulting in violation of the permit carrier. All perimeter silt fence must be maintained/reinstalled within seven (7) days.
- The General Permit states that all barren areas which remain idle in excess of 21 days must be protected from erosion within seven days of the last earth disturbing activities. All barren areas appear to have violated this requirement.

If you have any questions regarding this letter or the inspection, please do not hesitate to call me at our Central District Office at (614) 728-3844 or email at harry.kallipolitis@epa.state.oh.us. In addition, please provide a written response (email preferred) to the action items addressed above within ten days from receipt of this letter. A follow-up inspection will be conducted to ensure the minimum conditions of the General Permit have been met.

Sincerely,

Harry Kallipolitis
Storm Water Coordinator
Division of Surface Water
