RE: LAKE COUNTY
MENTOR
INDUSTRIAL STORM WATER
FEDEX FREIGHT INC – MNT
PERMIT NO: 3GR00904

Mr. Ken Radford
FedEx Freight, Inc. - MNT
7685 St. Clair Avenue
Mentor, OH 44060

Dear Mr. Radford:

On July 24, 2012, this writer conducted an inspection of your facility located at 7685 St. Clair Avenue, Mentor, Ohio to determine compliance with the Ohio EPA General Storm Water National Pollutant Discharge Elimination System (NPDES) Permit for Industrial Activity. As a representative of FedEx Freight Incorporated – MNT, Sean Lopez was present during the inspection. Along with my observations from the inspection, I have provided comments concerning your permit below:

General

1. This facility is the location of FedEx Freight Incorporated - MNT, a facility distributes large freight for the industrial industry as described by Standard Industrial Classification (SIC) Code 4213: Motor Freight Transportation and Warehousing.
2. Storm water on site flows to the northwest due to the slope of the pavement. Storm water drains into two catch basins in two corners of the property, behind the building. The catch basins connect to a detention pond to the north of the property.

Inspection Observations

1. The garbage dumpster, near the south corner of the building, is not covered. This dumpster must be kept covered to prevent the collection of storm water and the formation of leachates.
2. A few oil leaks were spotted on the pavement, around the building, from leaking trucks. Implement good housekeeping practices by placing drip pans under leaks, when discovered, and immediately cleaning up leaks properly.

Action Items

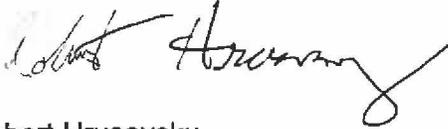

- Cover waste dumpster.
- Implement good housekeeping practices on oil leaks throughout the facility.

You are directed to provide me with a letter of response indicating the actions you will take to address the concerns and violations noted above. Please provide me with a letter of response no later than August 13, 2012.

FEDEX FREIGHT INC – MNT
