Mr. Scott Barta
Utter Construction, Inc.
1302 State Route 133
Bethel, Ohio 45106

Dear Mr. Barta:

On July 12, 2012, I visited the site located on 16600 State Route 7 Marietta, Ohio that has a construction storm water permit with the Ohio EPA. The purpose of my inspection was to determine the compliance of this site with the National Pollutant Discharge Elimination System (NPDES) permit for discharges of storm water associated with construction activity. The inspection was conducted under the provisions of Ohio's water pollution control statues, Ohio Revised Code (ORC) Chapter 6111.

There was no obvious construction going on at the time of the inspection. I could not get a hold of anyone and could not get into the facility to inspect. Please send us an update on the progress of you construction activity.

As a reminder, if your project disturbs more than five acres you are required to implement post construction water quality volume storage requirements with permanent storm water management structures as required by the permit.

If there are any questions, please contact Aaron Wolfe at (740) 380-5277 or me at (740) 380-5447.

Sincerely,

Sara Peters
