**Re: Storm Water Inspection Concerning Construction Activities Associated with  
Performance Training School on Taylor Road-- Permit#: 4GC03631\*AG**

Dear Mr. Foor:

This letter is written regarding the storm water inspection I conducted at Performance Training School on August 21, 2012. The Agency understands these construction activities are currently covered under the General Storm Water Permit Associated with Construction Activities. Based on the site inspection and the General Storm Water Permit, the following items must be addressed:

**Sediment Erosion Controls:**

- During the inspection we jointly evaluated the sediment pond associated with this site. Corrective measures have been implemented to ensure positive flow to the basin intended for sediment control associated with all barren areas. A sediment riser and/or skimmer must be established to ensure the effectiveness of this sediment control measure.

**Barren Areas: 21 Day Rule:**

- Be aware the General Permit states that all barren areas which remain idle in excess of 21 days must be protected from erosion within seven days of the last earth disturbing activities. In addition, erosion protection must be implemented for all areas of final grade within seven (7) days.

If you have any question regarding this letter or the inspection, please do not hesitate to contact me at our Central District Office at (614) 728-3844 or email at [harry.kallipolitis@epa.state.oh.us](mailto:harry.kallipolitis@epa.state.oh.us). A follow up inspection will be conducted to ensure the conditions of the General Permit are met.

Sincerely,

Harry Kallipolitis  
Storm Water Coordinator  
Division of Surface Water
