Re: Hidden Creek / Madison County

Dear Ms. Green:

This letter is written regarding the storm water inspection I conducted, on May 4, 2011, of the construction activities at your property located at Hidden Creek. The Agency understands that these construction activities are currently covered under the General Storm Water Permit Associated with Construction Activities. Based on the site inspection and the General Storm Water Permit, the following was observed or discussed at the site:

Sediment and Erosion Controls:

There was active construction at a new build located at 635 Heron Drive and a large barren area located near the intersection of Larkspur Drive and Hidden Creek Drive. The barren areas need to be stabilized. All disturbed areas which remain idle in excess of 21 days must be protected from erosion within seven days of the last earth disturbing activities. All areas of final grade must be protected within seven days. The barren areas appeared to be at final grade. Please see attached pictures.

If you have any questions regarding this letter or my inspection, please do not hesitate to call me at our Central District Office at (614) 728-3851.

Sincerely,

Gregory L. Sanders
