Re: Cornerstone Estates / Fairfield County

Dear Mr. Brigner:

This letter is written regarding the storm water inspection that I conducted on September 25, 2012, at Cornerstone Estates, located in Baltimore, Ohio. I understand that construction activities were covered under the General Storm Water Construction Permit. Please be aware that the following issues must be addressed prior to construction activity:

Sediment and Erosion Controls:

Please be aware that your current General Storm Water Construction Permit has expired. If you plan to start construction activities again, you will first need to submit a notice of intent for a new permit.

There did not appear to be any construction activity at the site. The site was stabilized and no erosion was leaving the site.

If you have any questions regarding this letter or my inspection, please do not hesitate to call me at our Central District Office at (614) 728-3851.

Sincerely,

Gregory L. Sanders
Environmental Specialist
Division of Surface Water
Central District Office
