**Re: Construction Storm Water Inspection at Newark Materials LLC  
Permit Number: 4GC03453\*AG**

Dear Ms Mock,

This letter is written regarding a storm water inspection I conducted Newark Materials LLC on December 10, 2012. The purpose of the inspection was to evaluate compliance with the General Storm Water Permit associated with Construction Activities. During the inspection, i staff noted the following issues associated with construction activities at this site:

**Sediment and Erosion Control:**

- This site appears to serve as an Industrial Mineral Operation. Currently the mining operations appear to be contained within the drainage area of the pit impoundments. I did not observe a discharge from the impoundments to waters of the state on the date of the inspection. Please understand any such discharge must be authorized under a different NPDES permit. The construction permit does not authorize any discharges associated with mining operations

**Permit Requirements:**

- I was unable to determine construction activity requiring a storm water construction permit. At the time of the inspection, I left word with you regarding the necessity of this general permit. You indicated Jerry Mock would contact me to discuss this issue further.

If you have any questions regarding this letter or the inspection, please do not hesitate to contact me at our Central District Office at 614-728-3844 or email at [harry.kallipolitis@epa.state.oh.us](mailto:harry.kallipolitis@epa.state.oh.us).

Sincerely,

Harry Kallipolitis  
Storm Water Coordinator
