RE: Construction Site Inspection, NPDES Permit 1GC04438*AG

Dear Mr. Harmon:

On Tuesday, November 27, 2012, I inspected the FMC-Trotwood construction site to determine compliance with its construction storm water discharge permit.

Based on my observations, the site appeared to be in substantial compliance with the terms of its permit.

I did not meet with anyone at the property at the time of the inspection, so certain administrative requirements of the construction permit were not evaluated. To help me determine if the site is fully compliant with its construction permit, please provide the following information:

1. A copy of the site's Storm Water Pollution Prevention Plan (SWP3). (If a true SWP3 is not available, send only the relevant parts of the rolled construction drawings);
2. Information that explains how the developed site will meet post-construction "Water Quality Volume" requirements, as explained in the permit beginning on page 20;
3. The name of the co-permittee for the project;
4. Copies of documented weekly inspections of the site's erosion and sediment controls for the month of November, 2012. The inspections are required until construction has been completed and all bare ground has been stabilized.

Mr. Rob Harmon, Vice President
