Re: Toxco Inc., Fairfield County

To Whom it may concern:

This letter is written regarding a storm water inspection that I conducted on January 14, 2013, at the ToxCo Inc. project located at 265 Quarry Road, in Lancaster, Ohio. Ohio EPA has received and approved this site for coverage under the General Storm Water Permit associated with Construction Activities. Ohio EPA's Storm Water Staff will be conducting future storm water inspections to ensure compliance with the General Permit. During the inspection, I noted the following:

Sediment and Erosion Controls:

- There were several barren areas at the site, as well as several stockpiles. Erosion controls were not in place to prevent sediment from discharging off-site. Erosion was leaving the site near the entrance along Quarry Road.
- Please be aware that the General Permit states that all barren areas which remain idle in excess of 21 days must be protected from erosion within seven days of the last earth disturbing activities. In addition, erosion protection must be implemented for all areas of final grade within seven (7) days. Given the time of year alternate erosion control measures such as erosion control matting, crimped mulching, mulch with netting and/or tackifier, or an approvable alternative must be implement for this site to ensure effective erosion control during the winter months.
- Please be aware that this property is located in a floodplain and any fill material deposited at the site will require approval from either the US Army Corps of Engineers and/or the Ohio EPA.

If you have any questions regarding this letter or the inspection, please do not hesitate to contact me at our Central District Office at (614) 728-3851.

Sincerely,
