**Re: Sugar Creek Packing Company, Fayette County
Construction Storm Water Permit 4GC03837*AG**

Dear Mr. Mallow:

This letter is written in regard to an industrial storm water inspection that I conducted at Sugar Creek Packing Company, on August 7, 2012, at your facility located at 2101 Kenskill Avenue, in Washington Court House, Ohio. The agency understands that these construction activities are currently covered under the General Storm Water Permit Associated with Construction Activities. Based on the site inspection and the General Storm Water Permit, the following items must be addressed:

Sediment and Erosion Controls:

1. There was active construction at the site. The silt fence at the site was in need of repair in a few areas. Please maintain erosion controls and inspect weekly or after a significant rain event (greater than 1 inch).
2. Please install a riser on the effluent discharge of the storm water pond outlet. Also, please stabilize the barren area around the storm water pond.
3. Please place filter covers on all storm water drains in the construction area.
4. Your contractor will need to complete and submit a construction storm water co-permittee notice of intent application. This application may be obtained at the following weblink:
<http://www.epa.state.oh.us/dsw/storm/stormform.aspx>. Your contractor is considered an operator per the construction permit. "Operator" means any party associated with a construction project that meets either of the following two criteria:
 1. The party has operational control over construction plans and specifications, including the ability to make modifications to those plans and specifications; or

Page -2-

2. The party has day-to-day operational control of those activities at a project which are necessary to ensure compliance with an SWP3 for the site or other permit conditions (e.g., they are authorized to direct workers at a site to carry out activities required by the SWP3 or comply with other permit conditions). As set forth in Part II.A, there can be more than one operator at a site and under these circumstances, the operators shall be co-permittees.

If you have any questions regarding this letter or my inspection, please do not hesitate to call me at our Central District Office at (614) 728-3851.

Sincerely,

Gregory L. Sanders
